

Improve client service with digital dictation from Lexacom

With the introduction of LASPO, using the right technology to improve efficiency is more important than ever if Law Centres, law firms and other advice agencies are to continue to provide affordable access to justice for all.

Lexacom Digital Dictation is an efficient, accurate and cost-effective digital dictation system that enables lawyers and their secretarial teams to dictate, transcribe and dispatch documents accurately quickly and easily.

Lexacom has been a leading provider of digital dictation in the healthcare market for over fifteen years and is now working with a growing number of legal and other professional services firms to help them improve admin efficiency and workflow.

Introducing Lexacom 3

Lexacom 3 offers maximum efficiency, control and flexibility when dictating, transcribing and reviewing documents.

Key features include:

- Encrypted, cloud-based technology, enabling multi site information sharing across sites and secure mobile dictation (when combined with Lexacom Mobile)
- Ability to send attachments/additional instructions with dictations or copy and past from other documents
- Advanced management and reporting tools to monitor efficiency
- Track and return transcriptions to author electronically for checking/approval
- Automatic software updates and UK technical support

Our easy to use, intuitive software is compatible with all major brands of dictation hardware and can be adapted to integrate with many existing IT systems.

Lexacom Mobile

With the Lexacom Mobile App, you can record, track and approve dictations wherever and whenever you like.

- Improve accuracy and speed of response by recording dictations at your client's office
- Work from home or on the move with full access to dispatch, tracking and approval functions.

Using secure, encrypted Cloud technology, Lexacom Mobile works with your office-based Lexacom 3 software to provide an integrated mobile dictation system.
