

PAPERLESS HOMEWORK SDN BHD

In the world, a great deal has changed especially the speed and the range of equipments now connected to Internet. One issue that has not changed until today is the way we access the web pages which is through ICANN based web addresses e.g agepaperless.com or whatreallyhappened.com.

The names are difficult to remember for most addresses nowadays. It was the major cause of the DotCom crash when site owners ran out of cash to advertise their site names few can remember. The common ones like "computers.com" have all been taken and not available to others both locally and globally as one registration covers the globe.

Our AGECityConnect, we expect will change the way people browse the Internet using very easy to remember AGECityConnect Multi Indexed/Languages Browser.

Now users can key in any name e.g

The Star for www.thestar.com.my

The Sun for www.thesundaily.com.my

三星 for www.Samsung.com.my

中国报 for www.chinapress.com.my

AGECityConnect

Benefits

World's first multi indexed Names e.g.

Windows Azure to index to www.windowsazure.com.my. The former is easy to brand and market as well as intuitive. Imagine trying to promote the first on TVs with seconds to spare.

First multi-language browser

This feature should enable many to be able to browse the Internet and reach out to the sites they like. Companies and governments can now reach out to the non English educated using local language web sites indexed names.

Indexing to Multi browsers the USPs describe in 1 and 2 can be used for other browsers like Firefox, IE, Safari or Chrome etc.

That means users can type in 中国报 for www.chinapress.com.my users can easily load it to FireFox or Chrome etc.

Local Shortcut names indexing plus Parental control feature

This is very useful for sites that have not been indexed nationally or globally using local native languages or non native languages/acronyms.

BH for berita harian's or The Sun for www.thesundaily.com or "三星" for www.threestarsrestaurant.com instead of the nationally indexed Samsung Malaysia's www.samsung.com.my.

AGECityConnect Domain name indexed to multiple websites

Each AGECityConnect name can be indexed to one main website and multiple secondary web sites.

It would make DDOS attacks more difficult as attackers have to attack more than ONE site at once. If the secondary sites are linked to high capacity hosts like Facebook or twitter then DDOS attacks are not easy to achieve.

Summary

Company Name:

Paperless Homework Sdn Bhd

Company Website:

www.agepaperless.com

Description:

The company initially specialized in online/offline e-learning solutions and obtained MSC Status in 2009.

Since then, the company has made a major shift from education to a new project we can categorized as "Smarter Browsing" by offering a patent pending Multi Indexed /languages browser to complement all browsers currently in the market.

It would be the first time ever that Internet Browsers can use any language to browse the Internet. Currently the only way to browse with native language is to do google search not directly to the site wanted.

In the light of such a browser, a huge market is now available to resellers around the world esp. countries e.g Korea, Japan, China, Arab countries etc where English is not the native languages to sell to companies Indexed names to help users to reach their official websites.

We shall be very similar to ICANN selling web site names, while we sell easy to remember Indexed Names of all languages to link to the ICANN web sites.

Licensing/joint development of such capabilities are also available. Since we are the only party in the world providing such a cloud based Indexed service, companies with abilities to reach out to all companies, govts, in the world are invited to find out the huge business opportunities thus created by our new invention.

Feel free to visit the website below & place orders:

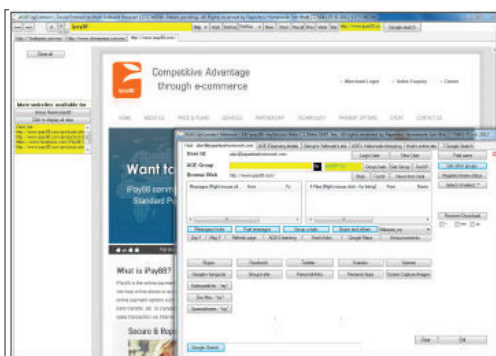

www.paperlesshomework.com

PAPERLESS HOMEWORK SDN BHD

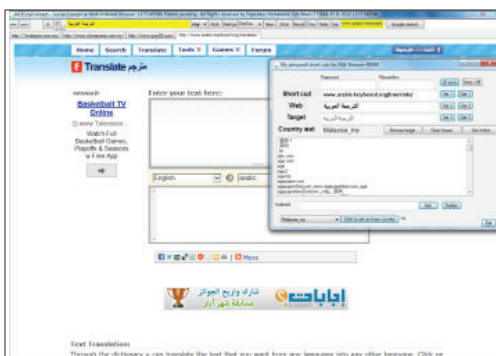

Using acronym "EB" to access www.exabytes.com with hyperlinked secondary sites www.exabytes.com and www.exabytes.my shown to the left.

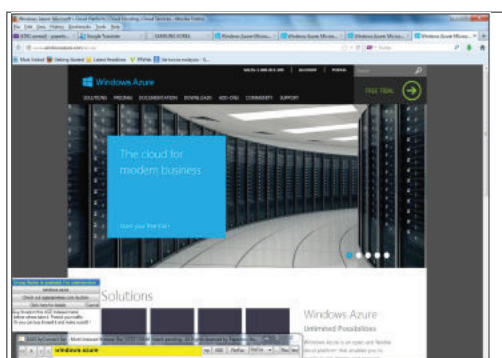

Sample only... lpay88 (note no .com) with DDOS (multiple secondary sites) and AGECityConnect CRM page where site owners can communicate with staff, customers, general public or co hosts. Instead communication through Skype, twitter etc.

Using native indexed languages name (in this case中国报) to access a web site www.chinapress.com.my . Any Unicode enabled language may be used.

Shortcut name to address an Arabic site called www.arabic-keyboard.org/translate/. Similarly undesirable sites can be indexed to blank pages or other sites as desired by the computer user.

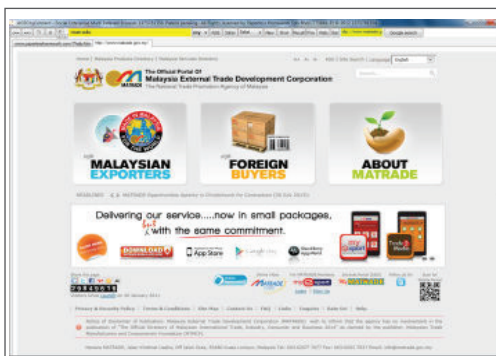

Note the notice that "windows azure" name is available for subscriptions at the bottom left and just above the toolbar. Once taken, this same name "windows azure" will land to the purchaser's sites which can be anywhere. Names can be of any Unicode supported language.

The page is set to a US environment. However, if the site is set to , my for Malaysia, then to access this same page , one uses Ron Paul~us to inform the system that this is US based Domain name.

AGECityconnect indexed "The Sun" to load on Safari browse. This sun is directed to Safari browser here.

Key in Matrade to get http://www.matrade.gov.my/ (note: very few would know to use .gov.my)
