3 billion WebRTC users by 2016.
Will you be ready to talk browser-to-browser?

The fastest, most robust, easiest way to implement secure WebRTC video, audio & data applications for the enterprise.

Why Use EasyRTC Enterprise?

EasyRTC Enterprise is a full-stack WebRTC toolkit suitable for building highly secure, enterprise WebRTC applications. It is a bundle of web applications, code snippets, client libraries and server components meticulously written and documented to work right out of the box.
With EasyRTC Enterprise, web developers can get up to speed and get real-world business applications that use WebRTC to market, fast.

The WebRTC API's in modern web browsers like Chrome or Firefox are evolving at a rapid pace - and will continue to evolve rapidly as the emerging WebRTC standard gets hammered out by various standards bodies, and the browser companies add competitive but non-standard add-ons. The side effect of this rapid change is that code you write today may not work tomorrow.
Our business is to normalize and hide WebRTC API changes by providing an easy-to-use client side API that remains more constant, so your developers can get their applications built without having to be WebRTC gurus.

We give your developers a kickstart in the WebRTC world by providing not only our toolkits, but also complete working enterprise strong WebRTC apps that can be re-skinned and configured for your organization by making minor code and graphics changes.

Why work hard when you can follow our lead?

The Hand Off - Move from your smartphone to your desktop without leaving the video conference room. No more conversations missed while you "dial in" from another device.

Secure End To End - Whether you're talking about confidential contracts internally or finances with a client, your connection is completely secure. No-one steals anything.

Your Server or Ours? - Strict policies about who can store and access your data? Need to have everything on your own secure server? EasyRTC Enterprise as Platform-as-a-Service or as Licensed Software - you choose.

Award Winning
"Best New Tool 2012" & "Best Overall 2013"

Web RTC
CONFERENCE & EXPO
South San Francisco, CA

EasyRTC Enterprise is the easiest-to-implement, most robust quick-to-market WebRTC platform out there, whether you need Platform-As-A-Service or On-Premise.

Working Code to Accelerate Time-to-Market
With working, tested code and the source code for Tawk.com - with a few tweaks you'll have your own custom WebRTC enterprise application.

Your Servers or Platform-as-a-Service
With our licensed option, sensitive data resides on your own secure servers. Start with our Platform-as-a-Service for development and transfer to your own servers for production.

Enterprise Secure
We secure our servers with HTTPS, proxies and private networks. All conversations are encrypted from browser to browser.

Fitting your Existing Systems
EasyRTC Enterprise integrates seamlessly with public or private web sites using existing systems for authentication. We don't add another one to the mix.

Scale with Distributed Systems
EasyRTC Enterprise is a distributed set of WebRTC servers, database servers, load balancers, STUN and TURN servers and a monitoring server working with your application server.

Bring Your Own Device Support
EasyRTC Enterprise includes working native code to support iPhones and iPads. Our web applications also work on Android.

EasyRTC Database
EasyRTC Enterprise's database ensures you can scale and manage your data professionally. All the information we glean from client interactions is kept safe and secure.

Real-time and Historical Reporting
EasyRTC Enterprise reports show server load, who's using it from where, and what browsers and operating systems they are using.

Cross Browser WebRTC Support
Our EasyRTC Client API hides the subtle differences between browsers. We keep those API's up-in sync so your developers can concentrate on your application.
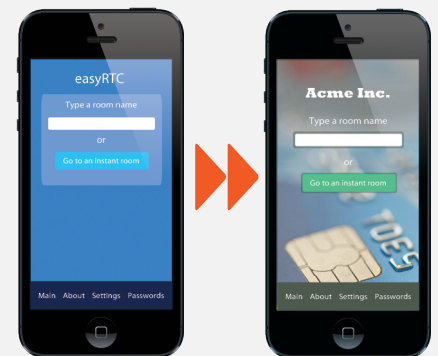

WebRTC Awards
EasyRTC won the Best WebRTC Tools Award at the first WebRTC Expo and Conference in November 2012 and Tawk.com and EasyRTC Enterprise won the Editor's Choice Award in June 2013.

Our Support
EasyRTC Enterprise customers get dedicated service. We can also augment your team with experienced WebRTC people to help with application development, architectural and systems management services.

Take our application and make it your application.

Quick Change Skin - EasyRTC comes with a native iOS WebRTC video chat app that can be reskinned in minutes using CSS.

Is EasyRTC Enterprise the perfect solution for your organization?

Talk to us. We'll be happy to answer all of your questions. And if you have a specific project in mind, we can also help you determine your organization's needs - and the EasyRTC Enterprise options available for you.
