

May 3, 2010

My 2006 Subaru Impreza Outback Sport, was averaging near 20 MPG – 22 MPG.
Afterwards In March of 2010, I began using Boost Fuel Saver, and after 10 tank treatments,
My gas mileage improved to 24 MPG – 26 MPG on average.

I noticed after my 3rd tank or treatment, my engine had more power, and was running better too.

I am positive my engine will experience longer engine life, while using Boost Fuel Saver.
The detergents in Boost Fuel Saver will keep the engine clean, and the lubricating oil components in
Boost Fuel Saver which are absent in gasoline, enhances upper engine lubrication.
And the high quality Fuel Catalyst will insure efficient combustion, and better MPG. Along with regular
oil and, air filter change intervals, and keeping my tires properly inflated too.

I truly believe there should be a Law, "Everyone must use Boost Fuel Saver!"

Sincerely,
