SecureNinja Delivery Formats – 5 ways to Learn

SecureNinja recognizes that people learn in different ways and has created training programs that reflect this multi-disciplinary approach offering several paths to professional training and certification:

- Instructor Led Dojo Based Training (Synchronous):** Expert ILDT training is available in locations throughout North America. These physical in class deliveries get you; up close and personal with your instructor, and come with expert curriculum, labs, complimentary breakfast and lunch.
- Remote Dojo Learning (Synchronous):** Remote Dojo instruction learning brings remote students virtually into SecureNinja physical classes currently running in the USA. Students and will be able to view and interact in *real time* with what is taking place in the classroom via a split/screen of live video stream and course curriculum.
- Live Online (Synchronous) :** Students receive the same expert training they would receive in our physical classroom with the added flexibility of attending anywhere in the world with high speed internet connection. Individuals and organizations will save greatly in the cost of travel and accommodations.
- Self-Paced Online Learning (Asynchronous):** SecureNinja's expertise delivered in our classrooms is now available over the internet or DVD's, with expert video instructions, hands-on lab simulations, testing modules. Each computer training class is presented in full motion video and audio allowing students to see the steps hear the detailed explanations and perform the tasks. Take training at your convenience and at your own pace.
- On-Site Training (Synchronous):** For groups of 7 or more students SecureNinja will come to you location and deliver the same expert training available in our publically scheduled classes. Let us handle the logistics while you save in cost of travel and accommodations and reduced downtime of employees away from the office.

At SecureNinja you learn from superior expert IA instructors

SecureNinja's world renowned expert instructors are all information security experts dedicated the professionalization of the information security officer. They are highly sought after leading practitioners in the field that contribute to national security policy and frequently speak at FISMA, NIST, DHS and industry related events.

Need an IV&V security assessment or pen test?

SecureNinja services/consulting specialize in governance, risk and compliance programs for government agencies including information assurance, IV&V security assessments, and cybersecurity solutions. SecureNinja has the knowledge and experience to keep your sensitive information safe.
