Complementing and connecting

You live in a world of dualities. As a leader, people expect you to have answers and solve problems, often with a high focus on details. But we all know that it's keeping track of the big picture that ultimately makes a project successful.

You are extremely accountable, but have to delegate.
You need broad knowledge, but rely on people with specialized skills.
You have authority, but must trust.

No matter what role you are playing, what hat you're wearing, or what direction you're going, having a talented and productive team is vital. Choosing people for your team requires both due diligence and instinct. And finding the right professional adds to the challenge.

We want to establish a relationship that complements you. We adapt to your workflow and to your company's culture. We call it *Fluid Responsiveness*. Because with the right partner, you actually become more powerful, more effective and more capable.

Tell us your vision, and where we fit. Connect to your 🙂 .

What really matters

Local Matters
We have our ears to the ground and take advantage of untold connections throughout this market. Considering the sheer number of technology professionals—it's really access to the right talent that counts. We've got you covered when it comes to the old adage, it's all about *who* you know.

Maturity Matters
Our recruiters and account managers are seasoned professionals who have a deep understanding of this industry. "Human capital" sounds so cold, and we never forget that our success is based on a human element— the PEOPLE. Nuance, finesse and experience mean you are treated the way you deserve.

Hard Work Matters
Whether it's a networking happy hour or closely evaluating a multitude of perspective consultant resumes, we work. We start fast, and finish strong. That's all we know.

Tech Knowledge Matters
We use a bullet-point list to show the types and range of positions we support. But because of our knowledge and history in IT, we know the technicalities of tech. We can help you to be comprehensive and even more strategic as you define your needs.

Complement
makes whole or
brings to perfection
