Cloud-based Document Repository Services

Receive improved accessibility to all of your files, wherever you are

Search, View & Print

Public Kiosk Access

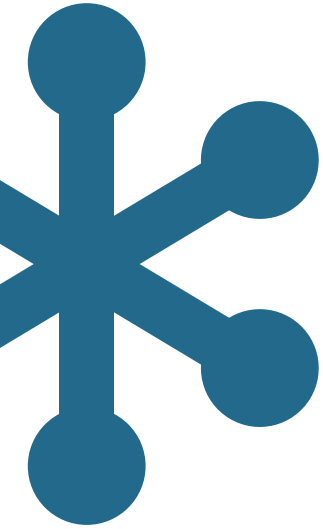

Mobile Access

Document Retention Tools

We understand the need for quick and easy access to your images, whether it's at the office or on the go. Our Cloud-based Document Repository solutions provide that, providing instant access for improved productivity and efficiency.

At Cogniserv, we've developed a number of solutions to ensure our applications work within your systems and adhere to any security requirements or other policy requirements.

On the go access. Immediate benefits.

Search, View & Print

Cogniserv recognizes the need for easy access to archived historical county images: Vitals, Deeds, Case files, and everything in between.

That's why we developed Countyserv, a place to easily host your images for quick access. This application compliments your existing recording or case management system.

Mobile Access

With the increase in working abroad and in the field, the need to access files or images on the go is more important than ever.

With Mobile Access, users will not only have improved productivity, but also the ability to make quicker business decisions. The county that provides the most access will always attract commerce.

Public Kiosk Access

In the age of global accessibility, public users have come to expect access to information on-the-go from their smartphone or tablet, and with county records that's no different.

Cogniserv not only provides access from your Wi-Fi devices, but also provides the user and county with rich data and statistics for advanced trends and analytics.

Document Retention Tools

In addition to providing image access and storage, it is important that Record Conservators are properly administering retention rules and policies.

Cogniserv has built in the necessary features to effectively manage temporary and permanent records and information.
