Innovative document services & enterprise software solutions

DOCUMENT
services

Headquartered in Dallas, Texas, Cogniserv is an innovative leader in document management services and data collection software technologies that cross all industry barriers.

Our Document Services cover the spectrum from traditional document management to the most sophisticated processes and technologies. Innovation in enterprise data collection technology also sets us apart with mobile workforce automation and field data collection, via mobile technologies.

SOFTWARE & MOBILE
business services

Cogniserv helps companies around the world improve productivity through rapid information exchange between the office and the field. Our solutions fully leverage the features of smartphones and tablets to capture critical data in real time. This creates transparency and enables businesses to better manage their mobile workforce.

MOBILE WORKFORCE

ACCOUNTS PAYABLE
automation

From basic document scanning to custom enterprise software, Cogniserv is committed to delivering best in class services and building innovative products that drive the highest value for every client.

Services & products to improve productivity

Document Services

Document Management Services have long been the cornerstone at Cogniserv, providing exceptional support, from creation to archiving, and nearly everything in between.

Our experienced team of experts have developed a repeatable document services model to ensure all documentation is properly managed and maintained:

- Preservation
- Imaging & Scanning
- Indexing
- Re-creation
- Cloud-based Document Repository

Software & Mobile Business Services

Our expert software engineers can develop a customized solution, tailored to meet your specific business needs. We're experienced with the most up-to-date technologies for:

- SaaS and MaaS Development
- Mobile Applications
- Proof-of-Concept
- Desktop Applications
- Enterprise Applications

Mobile Workforce Applications

FIELDSEV
field service re-defined

Automate workflow and improve customer satisfaction with the FieldServ app. Through improved dispatch and job assignments, faster field data collection, and advanced client insight and feedback, FieldServ will help streamline the project life cycle from start to finish.

FieldServ's intuitive design utilizes built-in mobile tools, such as WiFi, GPS, Bluetooth, cameras, and is still fully operational when offline.

FORMSERV
anyone anytime anywhere

For field staff, filling out paper forms is often repetitive and time consuming. FormServ changes that.

Through this mobile application, you can easily create customizable forms, quickly record data, and send reports immediately, completing data capture like never before.

No paper, no duplication, no lag time. Just legible efficiency.

Accounts Payable Automation

Human error is always a concern, especially when it comes to managing finances. With our AP Automation solution, which utilizes Palette's Enterprise Purchase to Payment solution, you'll lower your chances for human error with an improved digital accounting system.

Our AP Automation solution accelerates the accounting process by automatically handling certain aspects of invoicing and purchase orders, and provides an in-depth analysis on the company. Free up your accounting team from repetitive tasks to focus more on the business.
