

# FAQ

## How long does it take?

Unlike replacement, refinishing takes just a few hours.

## How long will my counters be out of commission?

You can use your kitchen the same day.

## What surface types can be refinished?

Most any surface can be refinished including laminate (Formica), solid surface, cultured marble and tile. You can even use Flint-Stone™ on bathroom vanities or wall tile to give your bath a contemporary look.

## Is a refinished counter durable?

A refinished counter is very durable, just like a new laminate countertop.

## What kind of existing problems are fixed during the process?

We fix scratches, chips and dents. Burns and knife cuts are repaired and disappear.

## Will my house smell?

We use a sophisticated exhaust system to minimize odor. Any residual odor is usually gone later that day.

## How much of a mess will there be?

None. We thoroughly prepare the workspace and clean up after ourselves. The only things left over are your beautiful counters!

## YOUR KITCHEN WILL BE TRANSFORMED

A Modern Look at an Affordable Cost

# Countertop and Vanity Refinishing

## Why refinish countertops and vanities?

Most of the time older countertops are structurally fine. The very top surface might be damaged, or maybe the color gives your kitchen or bath a dated feel. Refinishing gives your counters, and your kitchen or bath, new life for a fraction of the cost of replacement.

- **Save cost:** Refinishing can save 70% or more over the cost of replacement.
- **Modern look:** Using our Flint-Stone™ topcoat, you get the beautiful look of stone.
- **No mess:** Replacement means ripping out existing countertops, sinks, fixtures, even possible plumbing changes. None of this is required when refinishing.
- **Fast:** Refinishing is done in one day. Replacement can take weeks to measure and order.
- **No maintenance:** Refinished counters don't require messy, yearly sealing like granite. Who has time to maintain their counters?

## How the process works

- Cabinets, backsplash and fixtures are masked to keep them clean. We also protect the floor.
- Any grease, oil and dirt are cleaned from your counters with specialized cleaners.
- Scratches and chips are fixed with compounds specifically formulated for this purpose.
- The surface is prepped to ensure proper adhesion.
- We spray on 3 coats of polyurethane coating resulting in a durable, new surface.

## Colors

There are several options for colors to go with your existing decor. That way you don't need to change anything else in your kitchen or bath. Our Flint-Stone™ multi-colored coating has flecks in it that gives the look of stone without the cost. This is the look you want. No maintenance either. Ask your refinishing professional for swatches of actual Flint-Stone™ coatings.

## Makes sense for the environment

Refinishing can help ease the landfill crisis by keeping your current countertops and fixtures out of the landfill. Landfills are filling up and shutting down at an amazing rate. Since 1988, the United States has approximately 75% fewer landfills available to take on new trash. Don't be a part of the problem, be a part of the solution.
