The advertisement features a large, detailed image of a silver and black ACT pro eLock on the left side. The lock has a sleek, modern design with a horizontal handle and a vertical body. A small green LED light is visible at the top of the lock's body. The background is a photograph of a modern, multi-story glass skyscraper at dusk or dawn, with interior lights glowing through the windows. The sky is a deep blue. A large, solid blue shape is overlaid on the bottom right of the image, containing the text 'Secure, Wireless Access Control' and the ACT logo.

Secure, Wireless
Access Control

ACT
Access Control Technology

THE PERFECT SOLUTION

ACTpro eLock is a secure, versatile and cost effective access control solution that can be installed easily and quickly on most door types fitted with euro profile locks.

The eLock system is a battery operated wire free product and can be specified in a variety of environments including **health, education, public, commercial and leisure.**

COMPATABILITY

ACTpro eLock is compatible with our existing range of network door controllers and is available with a variety of high secure card technologies plus key override options.

THE FEATURES

LONG RANGE

Long-range wireless technology, with up to 32 locks per hub.

LONG BATTERY LIFE

Up to 3 years battery life or up to 200,000 operations of the lock.

ALERTS

Visual and audible system health alerts.

SAFE EGRESS

Always allows free-egress from the protected side of the door.

KEY OVERRIDE

Available with or without key override for doors of 35mm-60mm in width.

CARD TECHNOLOGY

Compatible with a wide range of card technologies.

ACTenterprise*

In keeping with ACT's policy of continuous support to its customers **eLock is managed through the ACTenterprise software suite.** The powerful role based application is extremely intuitive and simplifies administration and installation tasks. Information from the highly secure database may be shared with other on-site payroll, HR and membership applications.
