Nashville Business Journal Recognizes Entrada as a 2013 Small Business Award Winner

ENTRADA HONORED BY THE NASHVILLE BUSINESS JOURNAL DURING SMALL BUSINESS AWARDS CEREMONY FOR GREATEST REVENUE GROWTH

NASHVILLE, Tenn., September 12th, 2013 - [Entrada](#) was named a recent recipient of the Nashville Business Journal's 2013 Small Business awards, recognizing those businesses in Nashville that have achieved the greatest amount of revenue growth over the past three years. Entrada was selected as a winner for its triple digit growth in each of the last three years. The selected businesses were honored at an awards dinner held on Friday, September 6th at the Loews Vanderbilt hotel, as well as recognized in a special edition of the *Nashville Business Journal*.

Entrada's workflow solution protects physician productivity before, during and after the transition to an electronic health record (EHR) system. With seamless integration into all major EHRs, Entrada's [digital dictation application](#) provides a fast, easy way to document clinical information and makes EHRs much easier to adopt and use. With Entrada, providers can dictate from anywhere with their preferred mobile device, and after back-end processing and editing, Entrada's ExpressNote technology inserts the finished narrative directly into individual text fields within EHR templates. Entrada gives providers the freedom to dictate within EHR templates without being inside the EHR.

"We are truly honored to be named a Small Business Award Winner by the Nashville Business Journal," noted Chase Pattison, Chief Marketing Officer at Entrada. "With so much excitement and growth in and around Nashville over the past decade, especially within the healthcare industry, we are humbled to be recognized among so many great businesses doing such interesting and impactful things."

About Entrada

Entrada protects physician productivity before, during and after the transition to an EHR system. Since every provider's workflow is different, Entrada's cloud-based voice engine enables physicians to dictate on their terms, whether through a digital dictation and backend editing workflow or through real-time, front-end speech-to-text for those who wish to self-edit. Whether dictating from a worklist on a mobile device or from directly within the EHR with a speechmike, Entrada provides a fast, easy way to document clinical information and makes EHRs much easier to adopt and use.
