## Management Team

**Norm Towson, CEO**

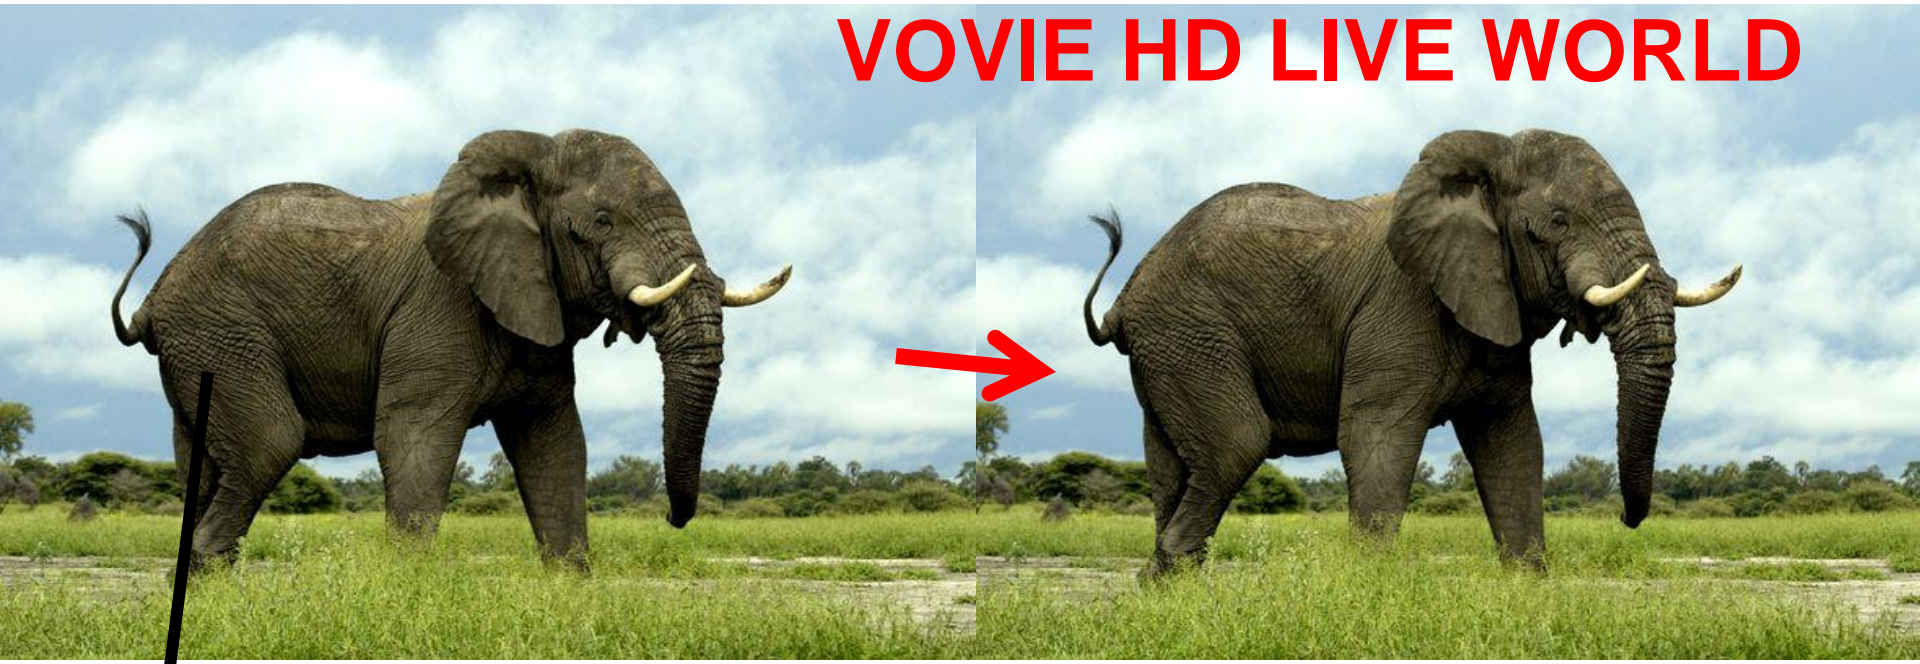

**Ted Rybicki, CTO**

Norm and Ted founded Meeting to You Corp after working on the video storage accelerator device/chip/patent now used by Netflix, Google YouTube servers. Both have many proven successes delivering profitable, high growth, IT products to Fortune 50 companies and consumers. Experiences gained building computing infra-structure products like computers, OS to BIOS-Microcode, routers, switches, network interfaces, and video to storage devices has been applied to VOVIE since 2009. Now we are running the highest quality and lowest bandwidth video/voice chat and live music share encrypted over the internet. Self funded to date we seek financial supporters to launch and scale VOVIE's HD Live World VIDEO & AUDIO for your: low cost, real time, personal secure power channel for global connectivity. Fly's over all networks.
