

STRATEGIC RESOURCES WEST

FACILITY EFFICIENCY AND UTILIZATION AUDIT

Fast and affordable, this audit gets you the data you need in short order to make well-informed decisions. Set up your audit today. The process is straightforward and the results are proven:

1

Your District's Unique Situation is Reviewed

- Examine current facilities
- Review future plans

A school district was experiencing a long-term decline in enrollment and their schools were operating inefficiently. Not only did this place a strain on the already tight budget, it also limited the district's ability to effectively allocate staff. After analyzing their situation, SRW recommended an action plan that improved facility utilization as well as enhanced budget and staffing effectiveness.

2

Data is Pulled and Analyzed

- Demographics
- Community growth information

Many factors have to be determined, such as where growth is most likely to occur, the number of students expected from different types of housing, and enrollment at each grade level. We thoroughly examine each piece of the puzzle and analyze the situation so that any recommended changes make sense now and in the long run.

3

Data and Recommendations Provided

- Better utilization of existing facilities
- Data for making accurate decisions

Strategic Resources West employs the appropriate technological tools and approaches to accurately project enrollment and facility needs, focusing on both the common and unique circumstances of the district regardless of the challenges.
