

Fiberforce® Recycled Plastic Lumber

FiberForce® reinforced Plastic Lumber is made of recycled high density polyethylene plastic combined with fiberglass. This combination provides better structural properties (strength and rigidity) for more demanding applications. Our boards are solid with pigment throughout to provide consistent color and uniformity even after cutting. We add ultraviolet stabilizers to provide longevity and protect color in outside applications. FiberForce® also boasts increased slip resistance as compared with Select™ Lumber.

FiberForce® Lumber has clear advantages over composite lumber products. Composite lumber is vulnerable to mold and mildew because it absorbs water. It is also prone to discoloration and fading, and is typically guaranteed for only 5 years. Other lumbers are very high maintenance, requiring continual applications of stain, paint, or sealant to ensure their beauty and integrity. However, FiberForce® Lumber does not absorb water, so it will never mold, rot, or mildew. Also, it will never fade or stain, so it remains beautiful for life! We even guarantee it by backing our recycled plastic lumber with a 50 year limited warranty.

FiberForce™ Plastic Lumber is perfect for structural or commercial projects requiring more strength, rigidity, and slip resistance. We recommend using FiberForce is on the load bearing components of a structure. For joist applications and other increased load-bearing needs, consider using BarForce™, which is reinforced with fiberglass rods. To lower the

Key Advantages:

- **Covered with a 50 year limited warranty**
- Maintenance Free – never needs painting, staining, treating, or sealing
- Impervious to water – will not mold, rot, or mildew
- Resistant to insects, marine borers and termites
- Not affected by organic solvents, oils, or chemicals
- Non chipping or splintering
- Environmentally responsible--100% recycled post consumer waste
- Will not fade or stain
- Workable with standard tools to drill, route, screw and cut

Fiberforce® Recycled Plastic Lumber

Imagine what you could create with these 15 beautiful, fade-proof colors.

Black	Cedar	Forest Green	Weathered Wood	Tan
Blue	Dark Grey	Industrial Dark Grey	Red	White
Brown	Grey	Mink	Spice	Yellow

Build Maintenance Free:

- Decks and Docks
- Gazebos
- Percolas
- Marine Structures
- Boardwalks
- Retaining Walls
- Playgrounds
