

### EMERALD STREET THIN-OVERLAY

Willard, OH

August 2013

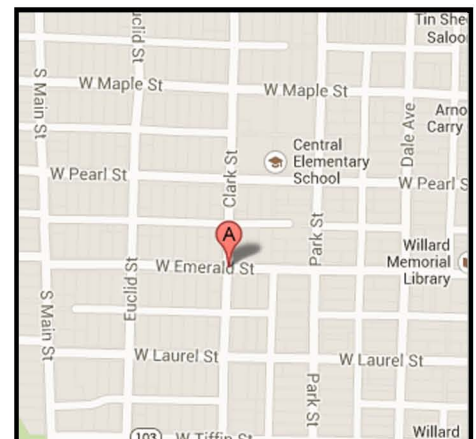

#### Project Description:

Many cities and towns across the country are making FORTA-FI® a regular part of their street maintenance programs. The 'City of Blossoms' elected to use FORTA-FI® fiber in a 1 in. thin-overlay project in the heart of downtown Willard. Busy and beautiful Emerald Street received a surface lift of reinforced asphalt over a standard job-mix leveling course. The three-dimensional reinforcement of FORTA-FI® will provide the citizens of Willard with a strong, durable street to enjoy for years to come!
