

LiveAction is a sophisticated network performance management and QoS control tool that enables you to optimize end-user experience and business application delivery by effectively managing your application-aware network performance. LiveAction visually controls your enterprise networks by simplifying the complexity of monitoring, analyzing, and configuring technology areas such as: QoS, LAN Switching, NetFlow, FnF, NBAR2, Medianet, AVC, PfR, Routing, and IP SLA. The latest LiveAction 3.0 release provides improved scalability and guided workflows to quickly resolve business critical performance issues in your WAN, SaaS and cloud application, MPLS or DMVPN links, converged wired and wireless connections, and video, VoIP, and BYOD devices.

Customer Benefits

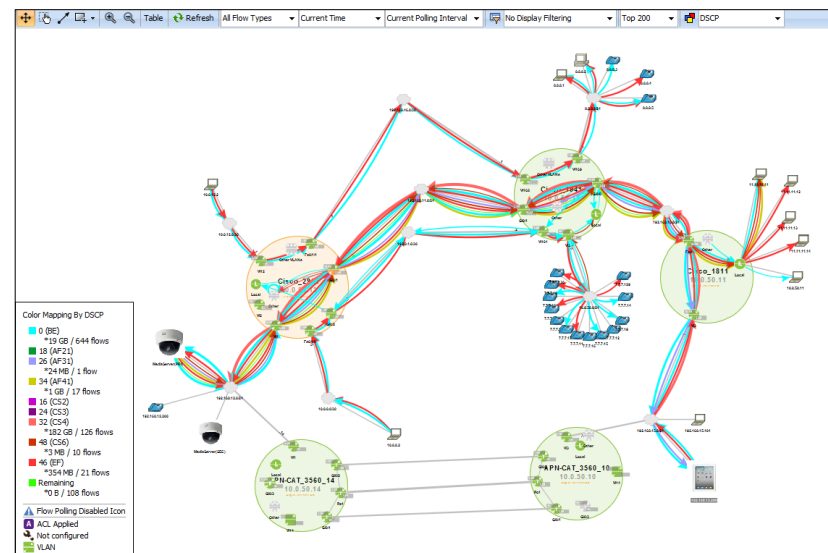

- **Save Time & Money** – Fast diagnosis and resolution of application and network performance issues across Cisco advanced technologies via LiveAction’s rich visualization of end-to-end network topology, highly intelligent dashboards, logically guided workflows, and swift QoS controls
- **Faster QoS Deployments** – Accurate configuration changes across complex Cisco QoS deployments through simple LiveAction point-and-click operations, hiding CLI complexity
- **Increased Productivity** – Deep understanding of network application traffic and QoS behavior with “pre” and “post” end-to-end flows and policy real-time views and reports
- **Ease of Operations** – Highly intuitive easy-to-use graphical interface that enables simple deployment, configuration, monitoring, and troubleshooting
- **Comprehensive Network-wide QoS Audit and Reports** – Single-click QoS audit for the entire network and a robust set of dashboard and detailed performance reports

Target Customer Segments: Mid-market and Enterprise

Supported Cisco Platforms

Cisco Routers

- Cisco® 800, 1700, 1800, 1900, 2600, 2600XM, 2800, 2900, 3600, 3700, 3800, 3900, 7200, 7600, ASR 1000 Series, CSR 1000v¹

Cisco Switches

- Cisco Catalyst 2960, 2960-X, 3560, 3750, 3850, 4500, and 6500 Series Switches¹
- Nexus 7000¹
- NetFlow can be used with Cisco Catalyst 3850, 6500 and 4500 switches. NetFlow Lite on Cisco Catalyst 2960-X/XR¹

Cisco Security Devices

- Cisco ASA 5500 Series running 8.3, NetFlow Secure Event Logging¹
- Cisco ASR 1000 Zone-Based Firewall High Speed Logging¹

Cisco Other: Network Generation Appliance (NGA)

Non-Cisco Devices

- Flow-only for Alcatel, Extreme, Brocade, Hewlett-Packard, Juniper, NetVanta, and nProbe
