H&W announces Day One support for SYSB-II running under z/OS 2.1

BOISE, Idaho – September 30, 2013 – H&W Computer Systems (H&W) today announced Day One support for its SYSB-II® and SYSB software running under IBM's z/OS® 2.1. H&W provides Day One support as part of its ongoing investment in SYSB-II and SYSB to ensure they offer the highest value.

"We're committed to providing Day One support to our customers," said Matt Link, Director of Business Development for H&W. "The companies that license these products expect a high level of service. Day One support is one way we strive to meet those expectations."

H&W is an IBM Advanced Business partner and participates in the IBM vendor program so it can offer Day One support. "We have a longstanding relationship with IBM that helps us create software that provides customers with the most beneficial experience possible," said Link.

H&W's enterprise software is a crucial element to many organizations' business operations. "We understand how important SYSB-II and SYSB are to the organizations that rely on them," said Link. "Because of this, we invest the resources to make Day One support for them a priority."

About H&W
