

# EMR Data Conversion Services

Now it's easy to migrate your entire practice from one EMR to another.

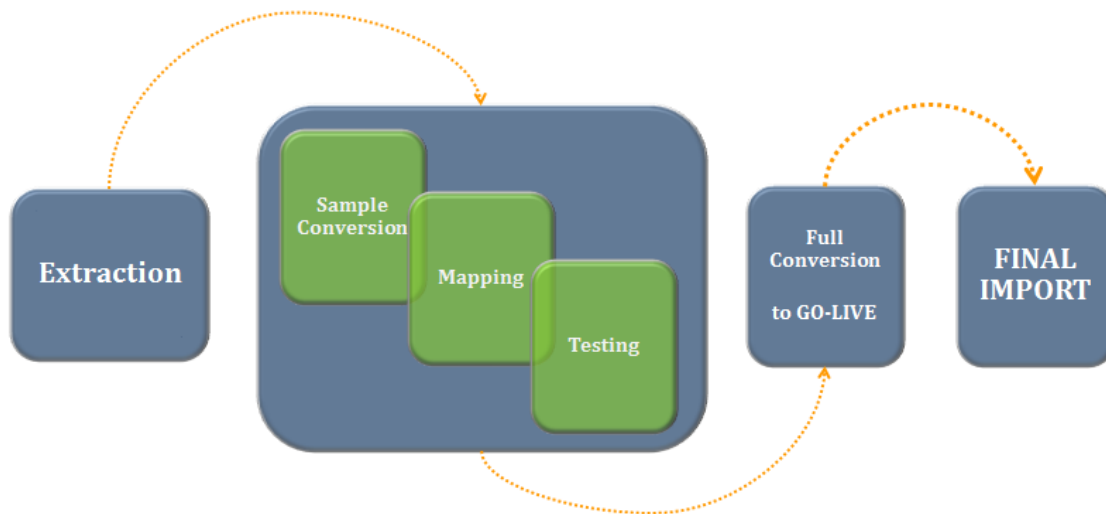

Physicians want the flexibility to switch to any EMR system that meets their needs. This is especially true today, as many practices upgrade to EMR/EHR products that qualify for government incentive funding under the HITECH program for "meaningful use." But without help, physicians can spend months researching and deploying a new EMR system only to learn that their current EMR vendor is unwilling to help extract the critical patient data out of their system, or charges exorbitant fees to do so.

ELLKAY makes migrating to any new EMR absolutely seamless and worry-free

- ✓ Switch to any EMR
- ✓ Save time
- ✓ Save worry
- ✓ Transfer *all* your data
- ✓ Save money
- ✓ Protect critical patient data

## How EMR conversion works

As a physician, you have a critical job to do. You should never have to worry about how to move all your patient medical data from an existing EMR to a whole new system. ELLKAY can help speed that process and do the heavy lifting, even preparing your staff for the transition. We are the industry's leading specialists in extracting, analyzing and converting clinical data from one EMR system to another reliably and accurately.

✓ **Extraction**

Our specialists analyze the customer's existing EMR to extract each data point.

✓ **Sampling & Testing**

We'll test the output against your EMR specifications until all data is displayed accurately.

✓ **Launch Day**

Once conversion is complete, your team will import the converted data for the customer.

## It's your data – Make sure all of it goes to you

ELLKAY does not sell EMR systems. We believe physicians should be free to choose whichever system works best for their practice and their patients. Our job is to deliver on the challenging task of migrating all of your existing data over to the new EMR. In most cases, this far exceeds what the EMR vendor is capable or willing to do with their own conversion tools.

### What data can typically be transferred from one EMR to another?

<b>Patient Demographics</b>	<b>Medications</b>
<b>Insurance</b>	<b>Allergies</b>
<b>Appointments</b>	<b>Vitals</b>
<b>Past Medical History</b>	<b>Immunizations</b>
<b>Family History</b>	<b>Scanned Documents</b>
<b>Social History</b>	<b>Lab Results</b>
<b>Surgical History</b>	<b>Encounter Notes</b>
<b>Images</b>	<b>Problem List</b>

ELLKAY has experience extracting and converting data from over 450 EMR systems. The depth of our experience means that we have developed additional modules for specialties such as cardiology, pediatrics, and more. It makes the entire transition process that much more secure knowing all of your data will transfer over safely to the new system.

## Partner with the leader in EMR conversion

You'll benefit from a number of advantages by relying on the industry's most experienced EMR conversion team, ensuring your data is converted accurately and quickly:

- An expert team knowledgeable in both EMR extraction and conversion
- Assistance selecting an EMR system that can meet your growing needs
- Transfer of all of your data, not only the subset offered by EMR vendors
- Accurate mapping and cross-referencing from one EMR to another
- Guidance for staff and project management of the entire migration process
- Additional support for EMR vendors when importing the converted data
- Reasonable pricing from a team experienced in working with high volumes

Leave EMR conversion to the pros while you focus on what matters most: your patients.
