Trifork is proud to announce the third edition of **NoSQL Search Roadshow London.** The conference has been designed for technical decision-makers, software developers, data managers, IT architects and technical ambassadors.

After running the NoSQL Search Roadshow 2013 in Munich, Berlin, San Francisco, Copenhagen, Zurich and Amsterdam the next stop is in **London on November 20!**

The NoSQL Search Roadshow offers ideal opportunities for learning, networking and tracking innovations happening in the NoSQL environment including MongoDB Riak, Neo4j, Hadoop, Cassandra and many others.

At the Roadshow participants will learn about efficient and cheaper NoSQL solutions that manage growing data and that help to improve data availability. Based on real life scenarios this conference aims to show how new Database solutions can simplify data management problems. This year the program is divided into **two tracks**: targeting developers and executives respectively. Besides one technical and one use case track three different training sessions are also offered!

Whether you are interested in gaining an in-depth understanding of the leading NoSQL Solutions on the market or you would simply like to learn from other companies that have deployed NoSQL in their organization, this event is for you.

Attendees can register on the website: https://secure.trifork.com/nosql-london-2013/registration/. The early bird offer (100 GBP) expires on 21.10!

Enjoy one, intense day packed with amazing talks, case studies and technical training!

## Free GOTO Night on NoSQL in London

On behalf of NoSQL Search Roadshow London, free warm up event is organized.

The GOTO Night is designed for developers who want to stay up to date with the latest tools, technologies, processes and practices in the software industry. This time **David Mytton,** founder of server monitoring tool, Server Density, will consider all the infrastructure requirements of a successful high performance infrastructure with hints and tips that can be applied to any NoSQL technology.

NOTE: The number of places is limited - First-come, first-served!

Attendees can register on the website: http://nosqlroadshow.com/nosql-london-2013/upcomingevents/

Looking forward to meeting you in London!

**About Trifork:**
Trifork develops products and solutions for the financial, government, manufacturing and telecom sector. In order to maintain the position as technological front runners, Trifork organizes software development conferences, training courses and technological networks nationally and internationally. Each year, more than 6000 participants and 900 speakers participate on Trifork organized conferences or training courses. Trifork is a leading provider of software training focusing on SCRUM, Agile, Spring, .NET and Java disciplines.
