

Perspectives on the Future of Agriculture

Congratulations to the winners!

Check out how they envision the future of agriculture!

“

We need to teach the city people that agriculture is very important because if we don't have farmers we don't have food.

”

Mike P., IL

“

I feel very good about the future of agriculture, I am in the process of transitioning from myself to my son.

”

Robert W., IL

“

Everybody still has to eat. There will be good opportunity.

”

Bruce K., IL

“

I am the future of agriculture! I envision agriculture as a catalyst for women across the globe to make a change in the lives of their families, communities, and the world. I envision educating women of color and oppressed women across the world to use agriculture as a method to generate income and change lives. I am the future of agriculture.

”

Dr. LaJoy R. S., MN

“

Agriculture will continue to improve and produce more food for more people. A big thank you to all our farmers.

”

Bonnie W., ID
