

# Invisalign at Slave Lake Dental

## The Clear Alternative to Braces

Choosing to straighten your teeth is a big decision that affects not only your appearance but your lifestyle as well. As an adult, you may be looking to improve on your smile for business or social reasons. Or perhaps you're a teen or the parent of a teen hoping to make the best of an inevitable situation. Either way, Invisalign® can provide a simple way to accomplish this.

### A Clear Alternative

Invisalign® straightens your teeth by using a series of clear removable aligners. Change them about every two weeks, and your teeth will move—little by little, week by week—until they have moved to the final position your dentist has prescribed. Comfortable to wear, our aligners are also removable so you can eat, drink, brush, and floss as usual.

### Less Treatment Time

A typical Invisalign® case takes about a year from start to finish. You'll see your dentist every month or

two to see how you're progressing. Every few visits, you'll be given additional aligners to continue your treatment. Commonly, the number of aligners worn during treatment is between 18 and 30, but treatment time and the number of aligners will vary from case to case.

### Invisible and Comfortable

Invisalign® is a virtually invisible solution. So you won't draw undue attention to your mouth while in treatment. In fact, virtually no one will know you're wearing them unless you tell. Comfortable to wear, our aligners are also removable so you can eat, drink, brush, and floss as usual.

WANT STRAIGHT, HEALTHY TEETH AND A

# Confident Smile?

*Invisalign can be your path to clearly beautiful pearly whites.*

Getting your teeth straightened isn't just for teenagers anymore. Like many adults, you have probably wanted to straighten your teeth. Our teeth tend to get slightly crooked over time, especially if we wore braces as kids but stopped wearing our retainer at some point. Straightening your teeth as an adult may seem to be an impossible dream, and you've got a long list of reasons why you can't do it. "I don't want metal braces at my age," or "It'll be too much trouble," or "It'll take too long," and—everyone's old favorite—"It'll be too expensive."

Slave Lake Dental addresses your concerns here:

- **"I don't want metal braces at my age."** With Invisalign, you don't wear metal braces. Instead, your teeth are straightened by wearing a series of virtually invisible plastic aligners. Almost no one can tell you've got the aligners on (unless you tell them).
- **"It'll be too much trouble."** Treatment with Invisalign is easy. You'll receive a series of clear aligners, which you'll wear for about two weeks at a time. You wear them all the time, except when you're eating, drinking anything but water, brushing, and flossing.
- **"It'll take too long."** We can't tell you exactly how long treatment will take. But Invisalign treatment takes, on average, about one year.
- **"It'll be too expensive."** Invisalign treatment is often similar in cost to traditional braces. In addition, if you have orthodontic coverage, Invisalign is often covered to the same extent as traditional braces. Dr. Pukanich also offers a variety of affordable payment plans. Our office will be happy to work with you on all of the insurance and financial details.

*Be one of the many patients we have treated who are enjoying their new smiles.*

**Call us to receive the special limited time offer of \$250 credit towards your Invisalign treatment.**

*Don't wait! The offer won't last long...*
