

MMI & BuildYourEMR™ Partner Up to Provide An Online Solution to ICD-10 Training

The Medical Management Institute (MMI) provides online ICD-10 training and certification while BuildYourEMR™ provides SmartSheet10™ to help avoid payment delays and better understand ICD-10.

Alpharetta, GA – October 11, 2013 – The ICD-10 implementation date is creeping up which is why the Medical Management Institute (MMI), the industry’s leader in online medical billing & coding, management, and auditing certification training is pleased to announce its partnership with BuildYourEMR™ to provide a solution to ICD-10 training for medical coders, billers, physicians, and instructors through a tool called [SmartSheet10™](#).

SmartSheet10™ workspace is an online tool created to help all professionals involved with the ICD-10 transition avoid payment delays and understand ICD-10 in just a few hours. Combined with BuildYourEMR™, a company committed to providing simple solutions for meeting Meaningful Use, it enables providers to automatically perform dual coding so they can begin using ICD-10 codes without affecting their current billing process.

Vicki Plumlee, Director of Clinics at Elk River Health Services, Inc describes the use of SmartSheet10™ workspace this way: “By making this tool available for us to use, you have taken all my ICD-10 worries away.”

About the Medical Management Institute (MMI) - The Medical Management Institute’s instructors prepare some of the most successful certified medical coders, billers, auditors, and managers in the field through the school’s comprehensive live and online classes. MMI has over 25 years experience and an alumni base of nearly 250,000 students.

About BuildYourEMR™ - BuildYourEMR™ is committed to providing simple solutions so that doctors can focus on their patients, document more accurately, and meet all of the Meaningful Use data exchange requirements for healthcare organizations of all sizes. By flipping EMR design convention on its head, BuildYourEMR™ is able to achieve all that for the doctor using their existing forms and workflows.
