Digiscribe Expands Document Scanning Services

Now offering Book Scanning and Large Format Scanning at Secure New York SOC 2 Type 2 Facility

Elmsford, New York – October 16, 2013 – [Digiscribe International](#), a leading provider of document scanning services, document management solutions and workflow automation software throughout the New York metro area, today announces its expanded service offerings of [book scanning services](#) and [large format scanning services](#).

“We are continually expanding our service offerings to better serve our existing clients and reach new markets. Virtually any critical business information our clients present to us, whether it’s contained in a standard size document, oversized document or book can be digitized, indexed and made available on any computer, laptop or mobile device. The architecture, engineering and construction (AEC) industry has very specific needs that can now be met with our large format scanner. Research labs, biomedical firms, municipalities, schools and many other organizations have bound and unbound books they can now digitize for archival and compliance purposes,” said Mitch Taube, Digiscribe President.

Books are scanned using an Atiz Innovation BookDrive Pro book scanner. Atiz book scanners are used by some of the most prestigious academic libraries, universities and museums around the world. The BookDrive Pro has a V-shaped cradle that holds the book open at a 120 degree angle for superior quality with curvature-free images.

Engineering drawings, topographic maps, circuit drawings and other oversize documents are scanned with a Contex HD 5450 large format scanner. This specialized scanner has full-size professional camera lenses and advanced image data processing algorithms to create superior image quality.

About Digiscribe

Digiscribe transforms the way companies, healthcare facilities and non-profit organizations manage and process their documents with document scanning services, document management software and workflow automation services. Companies engage us to solve their business process problems with a comprehensive portfolio of services and software that is supported with technical

expertise and superior customer service. We have over 20 years of experience and are one of the first SOC 2 Type 2 document conversion centers in the New York tri-state area. Digiscribe New England is a sister company of New York-based Digiscribe International.
