

Why Aspire?

CoNetrix can help you achieve your IT goals by offering efficient, economical solutions customized for your unique environment. Let's work together to find the solution that fits your business needs.

Financial Institutions

At CoNetrix, we understand the banking environment. From IT network installations and support to IT audits and network assessments. We comprehend the full spectrum of security needs in your unique high-risk environment. With Aspire cloud services, we go the extra mile to make sure your sensitive information is encrypted and secure. You can rely on annual third-party audits and support from trusted security experts for your peace of mind.

SMBs

By moving your applications to the Aspire cloud network, you reduce your IT overhead and fluctuating IT costs that can seem to overwhelm your business. By letting CoNetrix maintain your network, you can have an efficient IT operation and predictable costs to help minimize the stress of running your business.

Partnership

CoNetrix has partnered with best-of-breed technology providers to bring you an enterprise-class system, maintained by professionals who are experts in their fields. Our staff holds more than 500 years of accumulated information technology network and security experience. Let's build an IT Strategic partnership to increase your ROI.

Why CoNetrix?

Outstanding Customer Service - Our entire business is based on your trust that we will deliver on expectations, agreements, and promises. Our employees maintain the highest level of integrity, professionalism, and personal conduct.

Redundancy - Systems and applications run in a virtual infrastructure with redundant server hardware, firewall, Internet connections, and core infrastructure.

Business Continuity - Aspire services include fully managed backup and recovery to a private secure offsite environment.

Privacy - Each client system is an isolated environment to ensure privacy and security of information.

Support - Client servers are monitored during business hours, with after-hours support available when needed.

Security Assurance - External perimeter tests are conducted by a third party semiannually or after major infrastructure changes. Regular Internal audits are conducted by certified IT auditors (CISA, CISSP). Increased information security measures include an Intrusion Prevention System (IPS), antivirus protection, and web content filtering.

SSAE 16 Certification - CoNetrix successfully completed a SSAE 16 examination for its Virtual Cloud and Exchange Hosting Services. Annual third-party audits are conducted on Aspire cloud services to ensure the security of your sensitive information.

AspireServer

Aspire IT Hosting services by CoNetrix allow your business to reduce or eliminate on-premise technology such as servers, data storage, and backup equipment. Instead of housing bulky and expensive technology, clients can transition their applications and data to our enterprise-class computer infrastructure accessed securely via the Internet.

Benefits of AspireServer include:

- ➔ Enterprise-class technology and security at a fraction of the cost
- ➔ Timely software updates and patches
- ➔ Backup and disaster recovery for your critical business data
- ➔ Minimized capital expenditures on hardware and software
- ➔ Reduced employee labor costs for managing technology
- ➔ Predictable monthly costs

AspireRecovery

AspireRecovery is more than just backup. Our solution ensures your company can be back to normal operations in 24 hours or less. This fully managed "Recovery as a Service" (RAAS) provides a secure, reliable and cost-effective option to meet your Disaster Recovery requirements.

AspireRecovery features include:

- ➔ Daily managed and monitored incremental backups over the Internet using a secure connection to the Aspire Data Center. No VPN required for daily backups.
- ➔ Three days data retention. Extended time available.
- ➔ 24-hr Recovery Time Objective (RTO) for all servers.
- ➔ One recovery test window per year, performed over a site-to-site VPN.
- ➔ No DR needed? Use just the managed data backup service. Local data retention is also available.

CoNetrix can customize a solution that fits your specific needs. Contact us to learn about additional recovery services we offer.

Recovery Time Objective (RTO) – The maximum duration of time within which CoNetrix will restore customer servers and data after a declared disaster event.

Recovery Point Objective (RPO) – The maximum duration of time the customer will experience data loss if a file or server recovery is needed.

AspireMail

AspireMail offers Microsoft Exchange hosting in a multi-tenant configuration where each company's data and email addresses remain isolated and private. With AspireMail, CoNetrix provides a feature-rich Exchange and Outlook environment at a fixed per-user cost that includes all server configuration and maintenance.

Standard benefits to using AspireMail include:

- ➔ Upgrades to the current Exchange version
- ➔ Full-featured spam and malware filtering, with optional email encryption
- ➔ Complete features of Microsoft Outlook, which include calendar sharing and integration with Microsoft Office
- ➔ Password synchronization with customer's hosted domain
- ➔ Access to email from Outlook Web Access or ActiveSync enabled mobile devices

Use AspireDocs by CoNetrix for secure document sharing. Access your files securely from any device. Edit documents, create notes, store files, and share within your team. Your documents are hosted in the trusted private IT environment of the Aspire Data Center.

Access AspireDocs through:

- ➔ Internet browsers, such as Internet Explorer, Firefox, or Chrome
- ➔ Mobile apps for Apple iOS and Android
- ➔ Software clients on Windows and Mac, Windows Server and Remote Desktop Services

AspireDocs features:

- ➔ 448-bit Blowfish encryption
- ➔ Two-factor authentication available
- ➔ Managed file sharing for external personnel
- ➔ Policies include bandwidth controls, storage quotas, and file type restrictions
- ➔ Remote wipe of files and data on endpoints and mobile devices
- ➔ Optional local folder-level backup to AspireDocs
- ➔ Self-service available for account administration and policies
