

# THE CLUEN FOR LEOPARD PLATFORM

Leopard Solutions and Cluen have a new joint venture that is designed to deliver seamless integration of Leopard List data into Cluen's robust Encore contact management software. Data subscribers can now sign up for 'Cluen for Leopard' recruiting software. Everything that a typical boutique legal search firm needs, cloud-delivered, set up and ready-to-go, proven by decades of success of Cluen's platforms, automatically fed with data from their Leopard List subscription(s), and now sold on a 'per seat' basis. Clients will have the ability for (practically) unlimited growth by migrating to Cluen's standard platforms if ever desired.

Note: Requires Microsoft Windows and Office applications for full desktop installation, and any browser for light access via Slingshot web/mobile 'app' (see Mac whitepaper for Apple install guidelines)

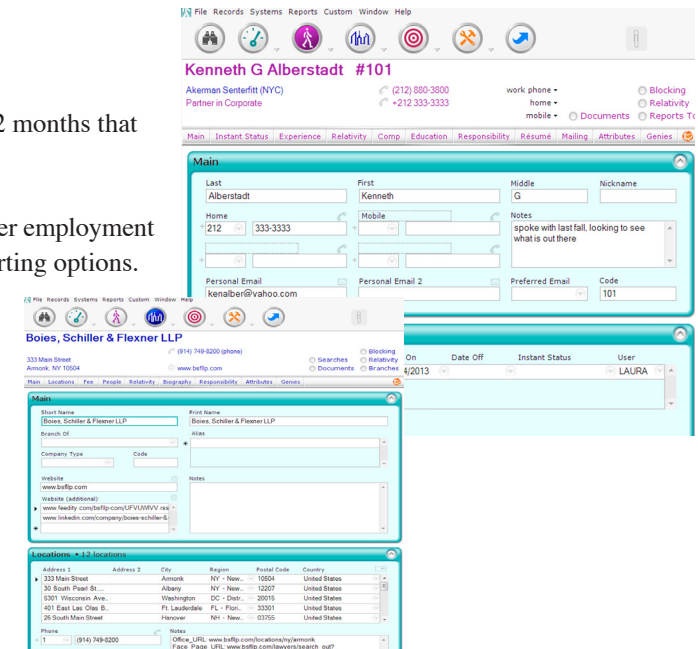

## CLUEN FOR LEOPARD – SNAPSHOT OF FEATURES

- **Automatic Updates of all Leopard data into the Encore system**
- Easily **Find People** like Harvard JDs from 2010 that were interviewed by you or IP Litigators you emailed in the past 12 months that went to school in California.
- Attributes allow you to **search on specific information** such as if the candidate has Portable Business
- The **Company System** keeps track of all attorneys at firms, their various offices, and gives a nice view of current and former employment
- Quickly generate **Briefing Reports for Internal or External meetings**. Endless custom reporting capabilities and exporting options.
- Relativity **keeps track of relationships** your contacts have with one another. Utilize your contacts, smarter.
- The **Document Management System** encapsulates multiple resumes, job specs, transcripts, and more.
- The **Outlook integration** includes the ability to send and save emails into Encore
- **Populate LinkedIn Profiles** from the social media viewer in Encore
- **Packetize** to send out a candidate's resume to multiple recipients OR email a candidate a firm bio or job specs
- The **To do list** links back to all of your data and helps you prioritize your daily tasks
- **Telephone dialer** to increase call productivity and automatically dial out your contacts
- Dashboard View to **see all of your current projects**, past success, and potential problem areas
- **ESP Artificial intelligence available** with advanced configurations to automate your unique workflows
- Slingshot **"Anytime, Anywhere"** access on your Tablet or Smartphone
- Secure Cloud deployment from a world-class data center, even earns European Union Safe Harbor compliance
- **Thousands of features** built over decades of feedback from legal search customers

Once you are on the Cluen for Leopard platform, you can always migrate to Cluen's other open-ended platforms, without losing any of your data investment
