

SQUID

ACTIVE COLD
COMPRESSION SYSTEM

DESIGNED WITH SCIENCE. PERFECTED BY ATHLETIC TRAINERS.

COMPRESSION PUMP - ACTUAL SIZE (3.87")

SQUID

2

15:00

Portable Recovery

The Squid pump may be tiny but it packs a powerful punch. The pump is durable and easy to use. The powerful motor drives four different compression levels up to 85 mmHG, adjustable even during a treatment.

SMARTER

Designed by scientists and athletic trainers from day one.

FASTER

The shortest treatment time available on the market.

DEEPER

Active compression drives cold deep into the tissue.

Our Sports Science Team

Shai Schubert, Ph.D

CHIEF SCIENTIFIC OFFICER

Dr. Schubert is an accomplished scientist and entrepreneur who combines cutting edge science and clinical acumen to improve athlete's recovery. Dr. Schubert completed post- doctoral training at the Harvard-MIT Division of Health Sciences & Technology (HST) biomedical engineering center. During his years at MIT, Dr. Schubert received and completed a National Research Service Award at Harvard Medical School. Dr. Schubert received his Ph.D in Biotechnology from the Technion - Israel Institute of Technology.

Brant Berkstresser, MS, ATC

ATHLETIC SPORTS MEDICINE ADVISOR

Mr. Berkstresser is an accomplished athletic trainer and a leader in his field devoted to athletes' health and safety. Mr. Berkstresser currently serves as the Harvard University Assistant Athletic Director for Sports Medicine and Head Athletic Trainer. He has served as a member of Ivy League and Big Ten/Ivy League committees devoted to player safety. He completed his Bachelor's Degree in Education with an emphasis in Athletic Training at West Virginia University and earned his Master's Degree in Kinesiology at Kansas State.

**Our durable, go-anywhere system delivers
a full treatment in just 15 minutes.**

G O D E E P

Squid provides intermittent cold compression using our proprietary sequential compression wrap and cold gel pack to direct edema away from the extremities and towards the heart, promoting venous return. Our device is simple and easy to use, with a set up time of less than 1 minute, and provides the highest level of performance, comfort, and efficacy.
