RELIABLE BY DESIGN

Grinders

Pumping Systems

Inline Grinders

Belt Conveyors

*Experts in stainless steel equipment design and fabrication for food processing and material handling applications.*

Dumpers

Ergonomic Lifts

Mixer/Blenders

Screw Conveyors

Vacuum Stuffers

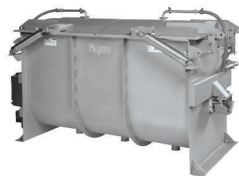

ThermaBlend™ Cookers  
(Double Agitator)

ThermaBlend™ Cookers  
(Single Agitator)

SaniTread™

Special Application Blenders

Continuous Cookers

## SYSTEMS INTEGRATION

Since 1932, Mepaco has engineered grinding, blending and material handling technology for some of the leading brands in food processing. Our years of experience and innovation have combined to offer finely tuned, integrated systems that provide a solid ROI for our customers. With our complete product offering and technical expertise, we can analyze your needs and provide a safe and sanitary solution that will increase your production and improve efficiencies. Whether it's an individual piece of equipment, upgrades to an existing line or a complete integrated system, Mepaco is your single-source supplier.

### CUSTOM METAL FINISHING

Increase corrosion resistance and reduce product adhesion with Mepaco's custom metal finishing solutions! Full submersion "pickle passivation" offers a cost-effective way to eliminate corrosion caused by welding and machine tools through the restoring of the oxide layer that protects the surface and leaves a clean and restored uniform appearance. Electropolishing offers an electro-chemical process that restructures product contact surfaces leaving a microscopically polished, smooth surface that is void of oxides and impurities. As a result, a sterile, bright, passive finish reduces surface friction and product adhesion.
