WebHostUK Launches New Range of Dedicated Servers housed in UK Data Center

London, UK - October 23, 2013 - WebHostUK (http://www.webhost.uk.net), A leading UK Web Hosting Solutions provider launched New Dedicated Servers to offer latest configuration hardware ideal for businesses at the best price in the market.

Looking for Unmatched High Performance Dedicated Servers in UK?

WebHostUK intends to improve web hosting experience for customers by offering latest cutting edge Dedicated Server Hardware with SSD Hard Drives in option that delivers faster application and website response time. The new extensive dedicated servers array includes Dual Core to High-End Dual Hex Core Servers starting from just £94.00 GBP per month.

WebHostUK Dedicated Servers are exemplary solution for IT professionals and SME's that requires high performance and secured servers for their websites and applications backed with consistent and reliable network. With no set-up fee and server deployment within 24-48 hours, customers can enjoy the benefit of Fully Managed Servers at no minimum term contract.

Tim Harris, Business Development Manager of WebHostUK said, "Providing customers with latest server hardware and technologies is our main motto and we continue to fulfill that by replacing old dedicated servers we offered with the latest ones." He further added, "New range of dedicated servers also ensures that we stay ahead of the competition. We are very pleased with this launch as our customers will enjoy high performance servers while they watch their business grow."

WebHostUK's Dedicated Servers are housed in state-of-the-art UK Data Center that offers up to 10TB Bandwidth connected to 100 Mbps network to deliver high speed. Customers get to choose versions of Linux and Windows Operating System and include Free Control Panel WHM/cPanel or Plesk.

Why to go for Managed Hosting Solutions?

Managed Dedicated Hosting has become an important and primary business requirement today. Built to meet your specific needs, WebHostUK managed dedicated servers are designed to give you an optimal compute solution for your website hosting needs and budget. All Dedicated Servers are fully managed servers which come with robust and tested hardware, server setups, OS patching, OS optimization, security tweaks, Proactive Audits and Updates, round the clock server monitoring with reboots, backups and more— while customers can enitrely and dedicatedly focus on their business growth. Powered with 24/7 support, WebHostUK in-house certified and experienced server administrators are available over live chat and helpdesk for support.
