Allsup Disability Study: Income at Risk

2

The quarterly unemployment rate for people with disabilities continues to be significantly higher than for those with no disabilities.

Quarterly unemployment rates

The third-quarter unemployment rate for people with disabilities rose slightly compared to second quarter 2013, reaching its highest level in 2013. The rate for those with no disabilities declined to its lowest level in more than a year. For third quarter 2013, people with disabilities experienced an unemployment rate 97 percent higher than people with no disabilities.

Social Security Disability Insurance (SSDI) applications declined in the third quarter of 2013.

SSDI applications

The number of people applying for Social Security Disability Insurance (SSDI) benefits declined by about 2.5 percent from second to third quarter. For the first nine months of 2013, SSDI applications dropped by 6.3 percent compared with the first nine months of 2012.

Veteran disability profile

Approximately 14 percent of veterans have service-connected disabilities. Three in 10 of these veterans have a disability rating of 60 percent or more, as of Aug. 2012, according to a 2013 U.S. Bureau of Labor Statistics report. Most veterans receiving benefits from the U.S. Department of Veterans Affairs (VA) for service-connected disability did not receive SSDI benefits.

Quarterly unemployment rates for U.S. Veterans

Although the unemployment rate for veterans has been lower than the overall adult labor pool, veterans with high disability ratings reported significantly higher unemployment, as shown on next slide.
