

Brain Academy Solutions Brief

Solutions Brief

[Intel® Developer Zone](#)

Enabled by Ultrabook™ Devices

While it's common knowledge that physical exercise is great for your body, did you know the same is true for exercising your brain? The brain is like the other muscles in the body since it can be strengthened and developed the more it is used.

The Brain Academy app by Manthan Studio, featured on Ultrabook™ devices, is a fun and interactive new way to exercise and ultimately strengthen your brain. Featuring 12 mentally challenging games designed to engage thinking, memory, logic and more, Brain Academy is an exciting and engaging app for children, adults, or anyone who enjoys empowering their mind.

Brain Academy features:

- Four mini games designed to test the player's brain
- The ability for players to discover the stronger parts of their brain
- Fully optimized for a touch screen interface for learning interactivity
- Share scores with friends on Facebook

Brain Academy is the entertaining way to stimulate, test and exercise your brain. It's designed for people of all ages:

Children – School-aged children can benefit from a fun new way to learn and reinforce subjects taught at school. Plus, they can strengthen their recall, logic and other skills to help them progress in school.

Adults/Parents – When school ends, it's often difficult for adults to continue using their brain the way it was used in school. Brain Academy provides an easy way to refresh the things adults learned in school, as well as strengthen their mind.

When developing Brain Academy, Manthan Studio optimized the game for the touch capabilities of Ultrabook devices for a more interactive, enriching experience.

Brain Academy features 12 challenging games under four subjects, including:

Math

Exercise the left side of the brain that is referred to handling math and analytics. Brain Academy tests the player's basic math skills including addition, subtraction, multiplication and division.

Visual Learning

Connect the pieces of puzzles within a limited time frame and more with challenges designed to test visual acuity

Memory

Test your memory through games that challenge your recall.

Logic Exercises

Discover how quickly you can determine the logic behind these mind-challenging games.

Brain Academy Powered by Intel

Ultrabook devices provide an engaging, entertaining and interactive way to test and strengthen your mind with Brain Academy. The touch and keyboard capabilities, visually rich display and Intel® Core™ processors combine to make Brain Academy an original game for anyone interested in becoming smarter.
