Enabled by Ultrabook™ Devices

While traditional organizational paper planners have been used successfully to organize and manage schedules for decades, new digital mediums like Ultrabook™ devices have brought traditional planning to a new level.

With Groovy Notes on Ultrabook systems, the traditional paper planner method of planning important work and personal events has evolved. Groovy Notes is a powerful new planning tool that allows users to take written and verbal notes for meetings, memos, anniversaries, lists, or even use as a personal journal. Then users can archive, search, backup and export the data. It features:

Intuitive User Interface

Groovy Notes provides a familiar, real-world diary like interface that organizes notes by category, tags, and date.

Powerful Search Feature

Groovy Notes allows users to find notes by dates, category, tag or a keyword.

Voice Memos

You can record your thoughts, an entire conversation, a meeting and more with a single tap. Plus, during a recording you can continue to take written notes.

Never Lose Data with Secure Backup

Easily export, backup and synchronize Groovy Notes information with Dropbox, either as PDF, plain text and/or MP3.

The GroovyNotes logo, featuring the text "GroovyNotes" in a stylized font with a registered trademark symbol, enclosed in a rounded rectangle.

Groovy Notes on Ultrabook devices is a better way to manage the details of daily life. Users can benefit from the touch features and visually-rich display of Ultrabook devices to create notes, lists, audio recordings, plans messages, agendas, calendars and more. Then they can access and backup their data with a simple push of a button or swipe on the screen.

Who Can Benefit from Groovy Notes?

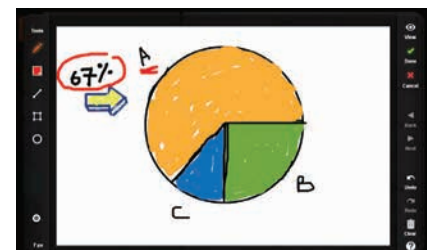

Personal

Groovy Notes makes managing a busy personal life easier. Users can organize family events, birthdays, children's sports activities, social gatherings and more.

Students

Students in higher grade levels who juggle multiple schedules and high workloads can greatly benefit from using Groovy Notes. They can use it to simultaneously record lectures while taking down notes, attach photos and hand-drawn sketches and more. They can then export this data and share them with their peers.

When creating Groovy Notes for Ultrabook devices inspired by Intel, XLabz Technologies' developers took advantage of the Intel® Core™ processors, high-resolution screen and touch capabilities in Ultrabook devices to create a powerful, interactive planning tool. Users can easily record and save written notes and voice memos, navigate through archives and calendars, and more through simple taps and swipes on the touch screen.

During the development of Groovy Notes, XLabz Technologies utilized the resources available to Intel® Software Partners in the Intel® Developer Zone. They also received inspiration in the communities within the Intel Developer Zone.
