

YoWindow* Solutions Brief

Solutions Brief

[Intel® Developer Zone](#)

Enabled by Ultrabook™ Devices Inspired by Intel®

Wherever you are, or wherever you go, getting accurate and timely weather information helps for planning each day. With the YoWindow* weather app on Ultrabook™ devices, discovering timely and accurate weather throughout the world is simple.

YoWindow by Repkasoft takes advantage of the visually-rich interface of Ultrabook devices to creatively display local, national and worldwide weather, either as a program to be opened, or as a default Windows 8 screensaver. It features hourly, daily and weekly weather, with high and low temperatures, wind, pressure and humidity information.

YoWindow features five different landscape backgrounds including Village, Seaside, Airport, Oriental, and Sky, and users have the option to turn any personal photos into a landscape for a given area. Regardless of the landscape picture, YoWindow's weather visuals are displayed, indicating rain, clouds, sun and even night and day. Users can easily get a weather reading by quickly glancing at their Ultrabook device.

YoWindow is a full-featured weather program with easy to identify weather graphics displayed right from the Ultrabook device home screen, or as a separate program to be opened.

As an Intel® Software Partner, Repkasoftware was able to access Intel® tools, code and support from the Intel® Developer Zone that helps members develop, market, and sell apps for Ultrabook devices. Plus, Repkasoftware developers were able to engage with experts through the communities, forums, and blogs within the Intel Developer Zone.

Who Can Benefit from YoWindow?

Personal

Weather information is helpful in planning the days and hours ahead, whether it be an afternoon outing to the park or a weekend event.

Families

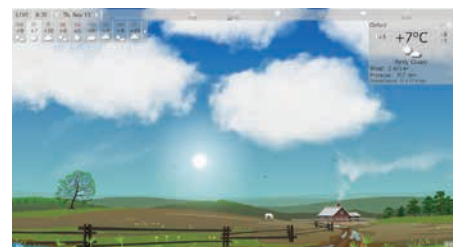

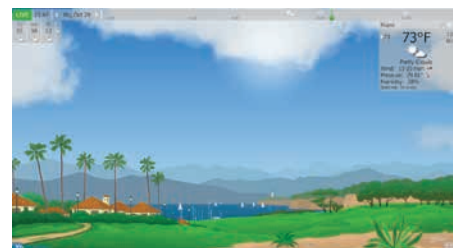

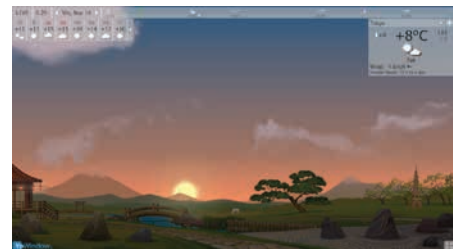

Having quick access to weather information is useful when planning for school events, children's sports activities, weekend getaways and more.

Business

Business travel and company events need quick and accurate weather information.

YoWindow Features:

- Regional, national and worldwide weather information
- Graph to see weather at different times and dates
- Automatic visuals that reveal the weather, including rain, clouds, snow, night and day
- Five landscape backgrounds including Village, Seaside, Airport, Oriental, and Sky
- Turn any personal photo into a selectable weather landscape.
- Set as a default Windows screensaver
- Save multiple locations

YoWindow Powered by Ultrabook Systems

YoWindow is the perfect complement to Ultrabook devices, providing visual displays of accurate and comprehensive weather information right from the home screen.

Ultrabook devices offer developers exciting opportunities to create new and innovative apps that take advantage of the touch and keyboard capabilities, visually-rich display and Intel® Core™ processors.
