[Business]inaBox...

What's in the Box?

Software + Hardware + Peripherals = Your Total Solution! We work with you to take the **software** that drives your business model; combine it with your desired tablet, our **hardware**, and any necessary **peripherals**, to create a packaged **solution** which gives the end user a functional kiosk the moment they open the box.

The box may include marketing collateral, cash drawer, receipt printer, custom branding, device management services or even custom development. Anything your end user needs to use your solution.

Whatever the need, when you engage with our team, we help you work through each detail of your project. Turning your product into a solution with no barriers to entry.

Procurement- We'll help you choose and procure everything, from tablets to peripherals, by leveraging our broad vendor network.

Custom Build- Need a custom solution? Our design-for-manufacturing process offers a cost effective, time sensitive solution.

App Development- Simple or complex, our development team provides experience and expertise from ideation to the app marketplace.

Custom Kiosk Branding- Our team provides custom branding optons for all ArmorActive® products; allowing you to match your kiosk to your brand.

App Imaging & Provisioning- Once you have selected your desired tablet, we'll image the devices with your app(s).

Technical Support- We can support your project 24/7, from start to finish; ensuring the long-term success of your project.

Fulfillment- Projects large or small, ArmorActive® has the capacity to manage the logistics; from packaging and inventory to shipping and long term support.

Device Management (MDM)- Using our cutting edge MDM software we provide remote monitoring; while you're able to manage all devices from one central hub.
