www.openassembly.com

Open assembly
assemble and share learning

Connect with colleagues and students
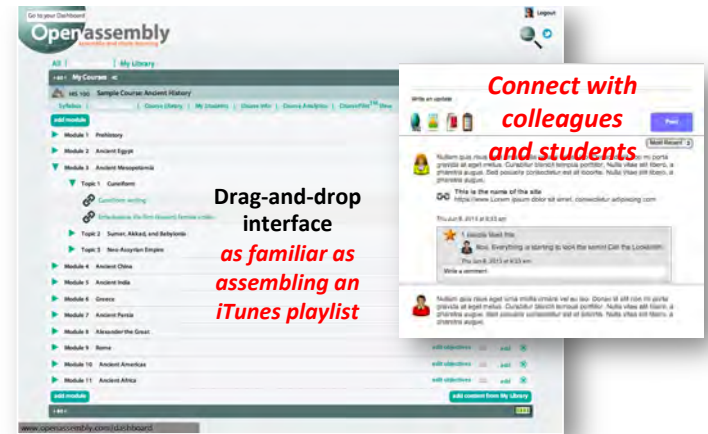

Drag-and-drop interface
as familiar as assembling an iTunes playlist

Open Assembly is developing a robust e-learning platform for the college market that radically lowers course material costs—while leveraging the potential of digital media to facilitate networked, 'social learning' – essential for Millennial student success.

Key to our solution are Open Educational Resources (OER), which enable the affordability, sharing, and remixing of digital media on our platform – as well as channel partnerships with publishers based on chapter-level content offerings.
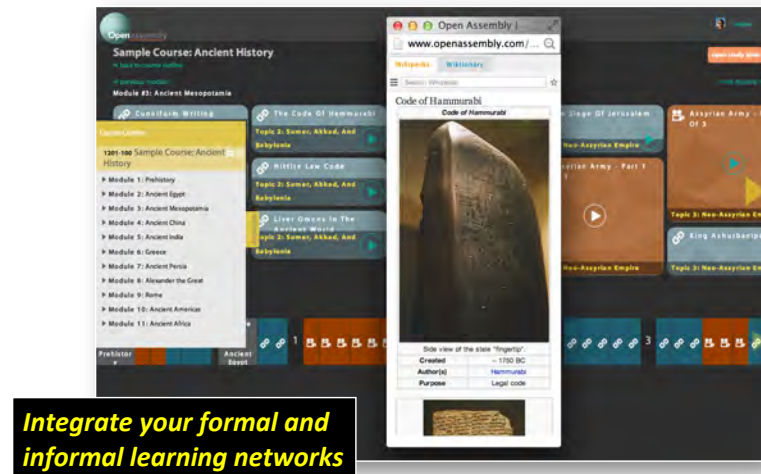

Integrate your formal and informal learning networks

The CoursePilot™:

YOUR PERSONAL LEARNING

ENVIRONMENT:

immersive

interactive

personalized

Take it with you from

course to course,

year to year--become a

lifelong learner

ADD PUBLISHER RESOURCES: *affordable, bite-sized chunks; purchase only what you need; pay as you go*
