

Hospice

Focused on care and the unique needs of hospices today

The software your hospice uses shouldn't be frustrating. You need a solution that provides up-to-the-minute information, so your entire team can focus on care. A solution that helps your hospice become **a smarter, more compassionate, healthier business**. If you are frustrated with your current software – or if you are documenting care on paper because you haven't found the right solution – Kinnser Hospice can help.

Kinnser Hospice helps you

- ✓ focus on care
- ✓ improve patient management
- ✓ streamline clinical charting
- ✓ improve collaboration

DESIGNED WITH HOSPICES FOR HOSPICES

Kinnser is revolutionizing hospice software through a unique approach to design and development. Since our company's founding in 2003, we have received many requests for a hospice solution that incorporates the innovative features that have made Kinnser Agency Manager™, our web-based software for homecare, the leader in its field. In that time, we have collaborated with successful hospices and knowledgeable consultants to gain strategic insight into the world of hospice and the factors that distinguish it from homecare. We learned that many of the classic Agency Manager features also applied to hospice – like our HIPAA-compliant messaging system, a workflow that supports accuracy and immediacy, a daily schedule for each team member, and an interface that is intuitive and easy to use – but that these features should be developed into a solution specifically for hospice.

PATIENT-CENTRIC INTAKE & SCHEDULING

With Kinnser's patient-centric approach to intake and scheduling, you'll be able to:

- Create a new or transferred patient with an easy-to-use interface that includes data validation and duplicate patient checks
- Quickly set up admissions and automatically create benefit periods
- Schedule clinical tasks right in the patient's online chart
- Access a patient's entire admission history including the daily level of care, each benefit period, and the bereavement period

Set up benefit periods and schedule clinical tasks quickly and accurately

KINNSEER Hospice

COMPREHENSIVE CLINICAL CHARTING

With full support for clinical charting, you'll be able to:

- Schedule, track and document clinical activity for all core disciplines of the IDG, as well as other services
- Document all assessments, NQF #0209 related pain assessments, the patient's care plan, the bereavement care plan and more
- Document all visit types including RN, MSW, Chaplain/Counselor, Aide, Supervisor and Miscellaneous visits
- Document certifications, recertifications and Face to Face encounters
- Track a patient's medications, including classifications and interactions, through their Medication Profile
- Easily track bereavement activities per bereaved person with the Bereavement Manager

ELECTRONIC BILLING FOR MEDICARE

Supporting your mission requires efficient, accurate billing. You'll be able to:

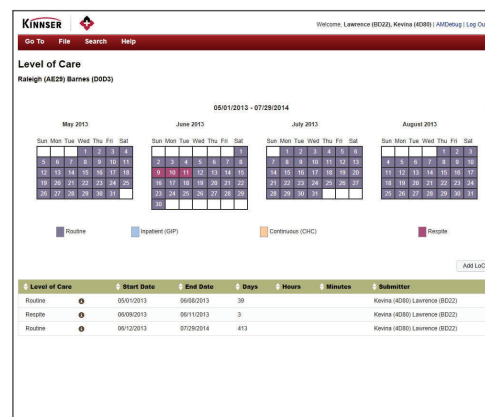

- Create claims and electronically submit them to CMS
- Post payments and transaction details from CMS
- Report on the health of your business

KINNSEER HOSPICE IS DIFFERENT

Because Kinnser Hospice is designed with hospices for hospices, it will help you focus on care and run a more efficient business.

- Kinnser Hospice is designed in compliance with hospice **Conditions of Participation (CoPs)**.
- **Bereavement Manager** provides the ability to link bereaved parties to the patient record and manage the bereavement period just as you would a benefit period. You'll be able to schedule and track bereavement-related activities such as emails, calls, letters, and visits.
- **Level of Care Manager** is part of the patient record and gives you an at-a-glance view that includes a color-coded calendar showing the level of care a patient was in on each day, as well as a tabular view of the total number of days at each level of care.
- Manage scheduling for all disciplines – even **volunteers, chaplains and counselors** – right in the **Benefit Period Manager** so all visits and tasks are recorded on the patient record.
- Electronic billing supports per diem rates based on a patient's level of care and monthly billing submissions.

Kinnser's easy-to-use interface streamlines your patient intake process

Make better informed decisions with access to a patient's level of care history

If you're ready for a software solution that allows the entire hospice team to focus on care and empowers hospices to be smarter, more compassionate, healthier businesses, please contact us for a free, no-obligation consultation.
