

START FRESH WITH DYNOFRESH.

DynoFRESH is an encapsulate in a fogging can that neutralizes odor causing bacteria and molecular odors (like smoke) leaving the room smelling fresh and clean.

Unique Dual Action Formula

1. Controls odors so room is ready for same day check-in
2. Neutralizes the bacteria causing odors, preventing further growth.

Proactive Odor Control

When you **join DynoFRESH in the Odor Free Rooms Program**, you are committing to **ending odor related expense and complaints**, retaining guest loyalty and achieving maximum occupancy rates.

Offer housekeeping a **progressive approach** towards odor neutralization that provides a **green technology**.

The objective of DynoFRESH is to raise guest satisfaction by preventing odorous rooms from EVER becoming a problem!

The DynoFRESH Odor Free Program

- ✓ Use DynoFRESH Do It Yourself fogger at the first hint of lingering odors to prevent guest complaints and bigger odor issues.
- ✓ The room is ready in only 4 hours!
- ✓ **The process is labor free!** This specially designed fogging can requires you to simply press the nozzle and leave the room.

Why DynoFRESH is Different

Unlike masking deodorizers and other machinery like ozone machines, which treat only the air, the DynoFRESH fogging treats EVERY surface in the room. The fogging solution acts on contact treating hard to reach areas such as the ceiling and walls.

DynoFRESH has an added ingredient that leaves your soft goods such as draperies, carpeting and bedding with a fresh clean smell like they just came back from the cleaners.

DynoFRESH was formulated by parent company, ChemTron. ChemTron has been a manufacturer for odor removal and engineering products for the hospitality industry for the past twenty years.

Product Usage

Usage

- There are two can sizes, large and small.
- The small, 11.7oz cans treat up to 250 square feet. These are perfect for small rooms or suites that have small separate rooms/spaces.
- A large, 19.4oz can treats 250-450 square feet.

It is recommended to have a case of each size on hand.

Large rooms, junior suites and 1+ bedroom suites:

- For rooms with a divider, even if it is partial – a small can is needed in each space. If the individual space is over 300 square feet and the odor is strong, use the large can.

Selection

DynoFRESH comes in two sizes:

☐ Treats up to 250 square feet.

Available in 6 or 12 can cases.

☐ Treats from 250 - 450 square feet.

Available in 6 or 12 can cases.

Included in packaging:

- ✓ cans
- ✓ Detailed directions for use attached to every can in English and Spanish
- ✓ plastic shields to cover the smoke alarm

Every case of DynoFRESH comes with a Money Back Guarantee.

Preparation

- ✓ Remove the source of the odor
- ✓ Smoke detectors should be covered with the DynoFRESH plastic shield (*included in the DynoFRESH case*) or *disarmed*.
- ✓ Set the air conditioner on HIGH FAN with the temperature low.
- ✓ Expose difficult to reach areas: open inside doors, drawers and lift cushions from furniture.

Directions

- ✓ Shake well before use.
- ✓ Push down and lock spray nozzle, pointing tip away from your face.
- ✓ Place the can on a towel near to the center of the room, closest to the A/C intake vent.
- ✓ Close outside doors and windows before leaving the premises.
- ✓ Put “do not disturb” sign on door. The door should NOT be opened for a minimum of four hours.

Post Application

- ✓ Wait 4 hours for optimal results.
- ✓ You may need to dry tile and wood floors that may become slippery when wet.
