

## EMT

**EMT PASS™ is the ultimate product for NREMT examination preparation.**

**We don't make this claim lightly. There are two main reasons why:**

1. Exam items were created by former NREMT Executive Director Bill Brown. His experience is unrivaled in exam creation and in understanding the format of the NREMT examination.
2. The app contains Bill Brown's no-nonsense audio rationales that have been called an "EMT class in itself" because of the depth and insights provided. Each audio rationale explains why the answer is correct and why the others aren't. The audios also contain tips on question interpretation and clinical issues.

With **960 questions** in **8 examinations** and **over 20 hours of audio recordings**, EMT PASS™ is the single, high quality tool you need to pass the exam. Our product is broken up into three sections. Section one covers the first half of the EMT knowledge base; the second half covers the remaining material. Section three contains two simulated final examinations. But our features don't stop there:

- Use EMT PASS™ at your desktop or on your phone or tablet.
- Listen to 7 mini-podcasts explain the exam and provide study advice and tactics.
- Pause exams if you get a call or go into class. The program resumes where you left off when you are ready.
- Each exam has a specific pass/fail cut score based on difficulty level.
- Receive customized audio feedback on exams based on your performance.
- High quality test questions and detailed audio rationales support users regardless of learning style or reading ability.

**Educators: For Bulk Discounts and live demos please contact:**

*All exam items in EMT PASS™ are original work. This product is designed to closely simulate the NREMT exam but does not contain any actual NREMT exam items. Limmer Creative and Bill Brown both support and respect the NREMT and its mission.*
