

AQUAPAD™

A new and revolutionary replacement for sand bags, the **AQUAPAD™** provides a more secure method for protecting property against flood water. **AQUAPAD™** soaks up water like a sponge. In fact, it is a better way to control water leaks from broken pipes, leaking water heaters, basement leakage and many other water problems. In it's dry state it only measures 18" X 20" and 1" thick and weighs less than a pound. Simply place it in the soaking tray, and just add water by hose or bucket. It takes less than 2 minutes to expand to 5" to 6" when fully activated.

Benefits

- Light weight for easy transportation
- Environmentally friendly degradable construction
- Simple water activation
- Cost savings compared to sandbags
- 18" X 20" X 1" and 5"-6" when activated
- 4 gallons absorbed in less than 2 min.
- 600 units per pallet (40" X 54" X 52"), 600lbs/pallet

Simply place in tray and fill with water.

OUR MISSION

*"TO IMPROVE THE QUALITY
OF LIFE AND PROVIDE
INSPIRATION FOR THE BLIND
AND VISUALLY IMPAIRED
THROUGH EMPLOYMENT,
OUTREACH, REHABILITATION,
EDUCATION AND RESEARCH."*
