

“Germy” answers your FAQ’s about ***Amazing! Nok-Out™***

? Is ***Nok-Out™*** a green product? Yes! EPA approved, non-toxic, environmentally friendly; approved for use in hospitals, long-term care facilities, out-patient clinics, surgery centers, rehab facilities, pharmacies, labs, ambulances, homes, schools, daycare’s, gyms, locker rooms, salons, restaurants, boats, ships, airplanes, trains, buses, automobiles, industrial processing plants, poultry hatcheries, dairies, veterinary facilities, pet grooming and boarding, and animal pens.

? How does ***Nok-Out™*** destroy germs, setting it apart from other disinfectants and deodorizers? By oxidization.

? What exactly does oxidize mean? Simply put, oxidizing agents disrupt or make a break in the cell membrane, which causes the cell to die.

? What does ***Nok-Out™*** smell like? ***Nok-Out™*** smells like fresh air with a slight hint of chlorine (not the chlorine of which our household bleach is composed of) which quickly dissipates. Because it destroys the source of the odor, it restores the air. By destroying the germs that make the odor, your environment becomes healthier for you and your loved ones.

? How do I know ***Nok-Out™*** is effective? Independent laboratory testing shows 10/10 kills on: **H1N1, VRE, Salmonella enterica, Staphylococcus aureus, MRSA, HIV1 and HBV**. Also, ***Nok-Out*** has a residual effect, continuing its germ-destroying capabilities long after it has dried.
