

## *Clamp-Alert Press Release*

On Friday November 29<sup>th</sup>, 2013, Clamp Alert, a free App for anyone who wants to attempt to avoid getting parking tickets or clamped ever again, will be unleashed into the smart phone marketplace.

The concept is simple; we want to create a Clamp Alert Community, where users can help each other to avoid parking tickets and clamping.

The App functionality is two fold, firstly you can set your app to park, and this will tag your GEO location. (Your park is now set)

Secondly other Clamp Alert users, when they see clampers or parking wardens can open the app and hit "report", this will then send immediate notifications to people who have set the clamp alert app to park, in that location.

It can potentially save us all a tremendous amount of heartbreak and money over many years from unfair clamping or sneaky parking tickets.

Clamp Alert will be available on Apple's AppStore and Androids Google Play Store on Friday November 29<sup>th</sup>, 2013. We hope you will all join The Clamp Alert Community.
