

Direct mail is your key to simple, secure communications that work within your existing workflow and software.

Direct fits right in to your current systems, so that all communications with patients, labs, hospitals, payers and specialists are easily attached to your EHR system. We make it easy and cost-effective to connect you with your patients and colleagues, boosting efficiency while achieving Meaningful Use.

- Engage patients
- Optimize referrals and transitions
- Complaint with HIPAA, Direct and helps meet Meaningful Use
- Connect with HIEs, hospitals, labs and payers

High quality meets high efficiency - Instantly send and receive summary care records, referrals, lab results, admission and discharge reports and more, and attach it all easily to your patient record.

Optimize referrals and transitions - with customized referral forms.

Engage patients - Connect directly with your patients via secure email or directly to their PHR. Share lab results, medication lists, record summaries and more, improving patient satisfaction and outcomes.

Cut costs - Reduce the need for paper, fax, VPNs, couriers and express mail, and get paid faster with rapid responses to medical documentation requests.

Achieve Meaningful Use - Meet Meaningful Use objectives for exchanging health information with third parties.

The simplest solution - Make no changes to your EHR, PMS or email systems. Direct mail is simple, affordable and easy to implement.

Simple. Secure. Seamless.
Your key to healthcare communications.

Who We Are

Secure Exchange Solutions (SES) provides a secure way for healthcare professionals to send and receive encrypted health information over the Internet. We work with physicians to ensure that our product is user friendly and fits easily into your current workflows. Our exclusive technology integrates seamlessly with any EHR, PMS and email system, so you can begin communicating with your patients and healthcare colleagues with no effort required beyond a simple download.

Technical Features

- SES products meet the requirements for Meaningful Use and are Direct compatible. Direct uses worldwide standards for universal secure e-mail communication.
- SES identifies sending and receiving parties, encrypts and digitally signs communications.
- SES is configurable with any SMTP server and the popular email services.

Contact SES today and open the door to integrated, secure communications.
