

Effortless Cloud-Based Web Management

CyBlock Cloud is an easy-to-implement Web management solution that benefits organizations of all sizes and quickly safeguards your network. Whether you have branch offices, remote users, or just one location, CyBlock Cloud protects your company and its employees allowing you to take advantage of time and money savings. Enforce your company's AUP by defining one or more Web-use policies to successfully address Internet abuse, legal liability, workforce productivity, and Web security threats.

Feature	Benefit
Customized Web access control	Filter Web traffic by all users, selected groups, or roaming individuals who leave and return to the corporate network
Web content categorization in real time	Continuous protection against malware and other security threats, high bandwidth consumption, and productivity drains
Broad coverage of users	Easily cover your main office, remote users, and branch offices with CyBlock Cloud
Easy administration	Since CyBlock Cloud is delivered as a service, reduce complexity and free up IT staff to focus on mission-critical projects
Affordable with lower cost of ownership	Realize significant cost savings by eliminating the need to purchase, install, and maintain on-premises hardware or operating system software

How the service works

- Web requests are channeled through CyBlock Cloud and checked against your blocking policies.
- Requests are either allowed or denied.
- Requests are scanned for malware and conformance to your policies before delivery to your network.
- When nonconformance is identified or security threats are recognized, a blocking message is issued, and access is denied.
- If there is no policy violation or security threat, the Web page is delivered immediately.

CyBlock Cloud Setup

Technical Advantages

- **Continuous List Updates.** Automatic list updates with no user intervention.
- **Minimal-Effort Administration.** No hardware or operating system software to support and maintain.
- **Quick Deployment.** Easily support remote users and branch offices.
- **Reliable, Independent Operation.** Consistent speed and performance.
- **Scalability.** Handle small to large amounts of data as your company grows.
- **Browser Compatibility.** Internet Explorer 7.0 or higher, Mozilla Firefox, Chrome, Safari, and Opera.
- **Support.** Access our knowledgeable support staff and services for free.

Security and Reliability

Our cloud data center is state-of-the-art SSAE 16 (SOC 1) TYPE II certified infrastructure and is monitored 24/7/365 by a network operations center. The cloud computing infrastructure is housed in a secure, fireproof, climate-controlled facility with multiple direct connections to the Internet backbone. Rest assured that your data will be safeguarded.

Evaluation Support

When needed, Wavecrest provides consultation and advice via telephone or e-mail at no charge during the free 14-day trial period.

Pricing

CyBlock is a licensed, subscription-based software service. Pricing is tiered, based on the number of personnel (“nonconcurrent users”) to be monitored. In general, the price-per-user decreases as the number of users goes up. Every CyBlock purchase includes:

- No-charge, U.S.-based technical support for the lifetime of your license
- Continuous URL List updates
- Free product upgrades

Discount pricing is available for government agencies, educational institutions, nonprofit organizations, and resellers. For more information, contact Sales at 321-953-5351, Ext. 3.

Wavecrest Computing has provided business and government clients with reliable, accurate Web-use management products since 1996. IT specialists, HR professionals, and business managers trust Wavecrest's Cyfin® and CyBlock® products to manage employee Internet usage – reducing liability risks, improving productivity, saving bandwidth, and controlling costs.

Wavecrest has over 3,000 clients worldwide, including Edward Jones, General Electric, IBM, MillerCoors, New York City Dept. of Transportation, Rolex, Siemens, and a growing list of global enterprises and government agencies.
