

Get the Florastor[®] facts.

Saccharomyces boulardii lyo

Florastor, the #1 probiotic worldwide,^{*1} is intended to help promote the body's own natural intestinal flora.^{†2} Anyone's intestinal flora can become upset and vulnerable—from travel, stress, or a change in diet, or simply from the effects of antibiotics.

#1

Florastor, an all-natural, yeast-based, non-bacterial product, helps maintain peace in your intestinal tract^{†3} and promote digestive health^{†2} which can result in better absorption of essential nutrients^{†2} while helping support a healthy immune system.^{†4}

The benefits of Florastor probiotics have been studied and trusted for over 60 years.

About Florastor[†] Probiotics

Florastor is unique because it contains 250 mg of the active probiotic ingredient *Saccharomyces boulardii lyo*, a friendly yeast found naturally on the skin of lychees and mangosteens (tropical fruits).

Florastor is a daily probiotic supplement intended to help promote the body's own natural intestinal flora.²

Florastor is an all-natural vegetarian, gluten-free capsule that promotes the intestinal health² of adults and children alike. Flavored powder packets are also available.

Florastor continues to work during antibiotic use, unlike many bacterial probiotics.⁵

Florastor is appropriate for children and babies as young as two months.⁶

Unlike many bacterial probiotics, Florastor does not require refrigeration.

Florastor vs. bacterial products[‡]

The benefits of probiotic supplements come from live microorganisms that are either yeast or bacteria, which interact with the body differently.

Yeast can withstand the harsh environment of the stomach,⁵ while many bacteria are destroyed by acids in the stomach before they even reach the intestines.

Yeast cells are bigger than bacterial cells, so yeast can provide increased gut protection and further promote intestinal health.²

Yeast probiotics, unlike many bacterial probiotics, are not compromised by antibiotic use.⁵

Yeast probiotics are often more efficient in increasing the production of immunoglobulin A (IgA), the primary antibody to support a healthy immune system.³

About Florastor[®]Kids:

FlorastorKids contains 250 mg of the same probiotic yeast strain as Florastor and comes in a tutti-frutti-flavored powder packet that can be dissolved in most drinks or soft foods.

Talk to your healthcare provider to help ensure that your probiotic delivers what your digestive system needs to give you the feel-good power of **NOTHING.**
