

# Thunderstorm Live Wallpaper for Android\* Solutions Brief

Solutions Brief  
[Intel® Developer Zone](#)

## Enabled by Intel® Atom™ Tablets for Android\*

New advances in technology allow tablet users to personalize their devices using an array of features. When the exceptional screen quality of Intel® Atom™ tablets for Android\* is combined with Thunderstorm Live Wallpaper, users enjoy a stunning, personalized home screen that showcases the awesome forces of nature.

Thunderstorm Live Wallpaper by Kitehface Software provides users of Intel Atom tablets for Android\* the ability to harness the majesty of a stormy sky on their mobile devices. Users can personalize their storms by making changes to cloud types, ambient light and wind speed.

Thunderstorm Live Wallpaper features:

- Continuously changing views of rainclouds on the Android\* tablet home screen. View a personalized thunderstorm that moves naturally and create lightning with a touch of the screen.
- Personalize storm wallpapers with a variety of settings like wind speed, cloud type, sky and bolt color, frequency of lightning bolts and cloud cover thickness.
- Thunderstorm Live Wallpaper has also been configured to minimally decrease the battery life of Android\* tablets.

# Transform Your Home Screen with Thunderstorm Live Wallpaper

Thunderstorm Live Wallpaper takes advantage of the high-resolution screen, excellent battery life and interactive touch capabilities of new Intel Atom tablets for Android\*. These stunning new live wallpapers offer a step up from static wallpapers, and provide users with the opportunity to create beautiful and personalized home screens for their tablets. There are numerous ways users can personalize their storms, including:

## Sky and Bolt Color Setting

Create a dazzling scene by changing the color of the sky and adding lightning bolts. From moody gray and purple clouds to bright pink lightning bolts, users will find an array of colors to customize their storms.

## Summon Lightning

Illuminate your tablet's screen with a bolt of lightning. Simply touch any part of the screen and then watch as lightning strikes.

## Bolt Frequency

Control the storm's intensity by regulating the frequency in which lightning bolts appear on the screen

## Course Location

Customize your screen by utilizing course location. Your screen will reflect the sunrise and sunset according to your time zone and location.

## Minimalist Mode

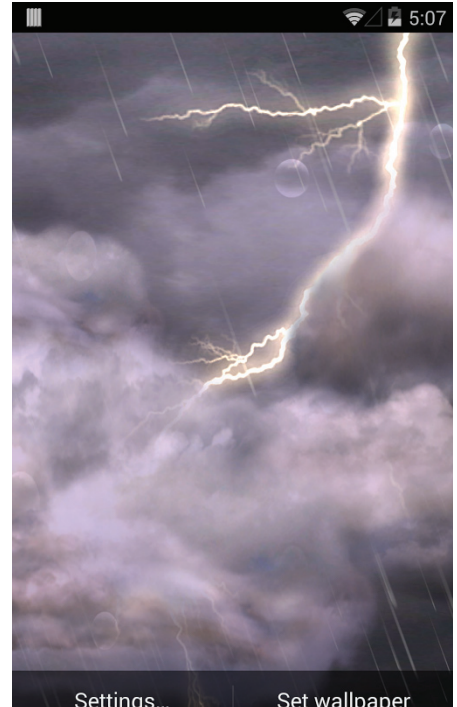

Keep it simple with the same beautiful, customized screen whether it is day or night by selecting minimalist mode.

## Landscape and Portrait Configuration

Turn your device any way and your storm will follow. These live wallpapers look beautiful in both landscape and portrait configurations.

## Raindrops

Enhance the thunderstorm experience and place yourself inside a cozy window when raindrops "hit" the home screen.

## Thunderstorm Live Wallpaper Powered by Intel

Intel® Atom™ tablets for Android\* can now have stunning, live wallpaper with Thunderstorm Live Wallpaper. The extended battery life, Intel® Atom™ processor, full HD high-resolution display and interactive touch capabilities make the new Android\* tablets perfect for showcasing nature's majesty through Live Wallpaper.
