

iPatientCare EHR and integrated Practice Management and Patient Portal Delight Allergists and Immunologists through Specialty-Focused Features/Functionalities and Workflow

"Involving specialists in the EHR revolution, especially those who are focused on serving a patient population that gets affected because of the regional/local allergens, is a challenging task. Most physicians specializing in allergy and immunology demand for an EHR and PM System that is designed for their specialty and not which is a generic EHR that provides few templates for their specialty! Allergist/Immunologists need specialized forms and injection therapy which is never provided by most EHR. Additionally, most specialists are concerned if the EHR they use is not yet Meaningful Use Stage 2 certified. iPatientCare EHR is an obvious choice for all allergists/immunologists looking to switch their existing EHR to an EHR which is Meaningful Use Stage 2 certified, designed for their specialty, is easy-to-use, and affordable, that is, no upfront licensing and data migration costs."

iPatientCare EHR is completely customized for the Allergy and Immunology specialty designed to improve office workflow and productivity. It has been utilized by hundreds of physicians nationwide. Although, it maintains the fundamental elegance of iPatientCare EHR's architectural beauty and ease-of-use, and additionally, integrates with iPatientCare Billing and Patient Portal. It provides the following excellent specialty focused features that set it apart from any other EHR serving allergy and immunology specialists nationwide.

Allergy Shots:

iPatientCare allows you to document patient's allergy shot details that ensures patient safety and improve efficiency. The Allergy Shot offers
