

# New Business Apps on Android\* and Windows\* 8 tablets with Intel® Atom™ processors Help Boost Productivity

Tablets featuring Intel Atom processors provide numerous options to support task-specific workers and have a lower total cost of deployment. With a higher level of performance and compatibility features, long battery life, and built-in security<sup>1</sup>, these new tablets are empowering workers wherever they may be.

New business-related apps for Android\* and Windows\* 8 tablets with Intel Atom processors are giving workers new and innovative ways to be more productive. The following are some of the new business-related apps featured these tablets:

## abcNotes Offers a New Twist on Traditional Note Taking

New Android\* tablets provide a portable platform to help organize and be more productive with abcNotes. This useful app merges the familiarity of the traditional sticky note with digital convenience. Featuring 88 attractive fonts, 45 varieties of note skins, 27 fun badge designs and 115 icons, it's a great organization and reminder tool.

## Create Powerful Images with the PicsArt Photo Studio App

With pictures becoming a more integral part of the marketing and business efforts of organizations, the PicsArt Photo Studio app is a powerful tool for Android\* devices. This creative app provides numerous photo editing features and photo effects that are simple to use.

These and other business apps featured on Android\* or Windows\* 8 tablets are helping workers on the go and in the office be more productive and efficient. The powerful processing speeds and longer battery life of Intel Atom processors, combined with the interactivity, mobility and high-resolution displays, make new tablets a powerful tool in almost any office.
