

Leverage Your Broadband

IRG is a Gartner-recognized, and VISA PCI DSS validated, provider of customized managed network services, offering a comprehensive portfolio of broadband and broadband-centric services targeted to retailers and other multi-site companies. Additionally, IRG is an industry leading, highly specialized, yet agile, single-source purveyor of managed IP communication, application and turnkey professional services; plug-in IRG applications such as Hotspot and Enterprise Wi-Fi solutions, Hosted VoIP, and IP-based Video Surveillance to further help Clients leverage their broadband investment in a scalable, yet secure manner. IRG's growing client base includes Fortune 1000 retailers, quick-serve restaurants and convenience store chains.

IRG has a simple objective: to provide retailers and other multi-site organizations with the premier suite of broadband-enabled network services that provide a competitive advantage while keeping costs in check. Through the managed integration of leading edge technology components such as DSL, Cable, Wireless, and traditional access, IRG is able to provide the most comprehensive network coverage and bandwidth availability to meet each client's unique business requirements.

A More Effective MSP

IRG recognizes broadband as a commodity. It's available nearly everywhere. The efficient management of your broadband products and services is what truly gives you advantage over your competition. If speed, reliability, and instant information matter to your business, contact IRG today.

"Hudson Group is a name synonymous with great customer service and is the traveler's best friend. We needed a partner to mirror our company's philosophy when looking to find a managed service provider for our new WAN. IRG has gone above and beyond, day in and day out, to show that our decision was the correct one over 5 years ago. I value this partnership and know that at the end of the day, IRG will be there for Hudson Group."

■ Gary W. MacRae, Senior VP & CIO · Hudson Group

"The IRG team fully stepped up to the challenge of being the hands-on WAN partner we envisioned when selecting them. Their detailed management of the 400-plus site store rollout was top notch, and their willingness to hunt and find low-cost broadband service, even when initially there appeared to be no broadband available, is unparalleled to anyone we've evaluated in the past. We value the partnership with their organization."
