

## OctoFire Eight Port Turbo Smart USB Charger

In the present market for electronic accessories, there is not a single multiport USB charger that has more than four ports. Making things worse, these devices are inadequate for charging tablets because they only provide one Amp per port of current. Optimal charging of tablets generally requires 2.1 Amps. Most of these chargers are designed for a particular brand. As a result, there was no USB charger in the market supporting optimal charging of more than four devices in an intelligent and brand independent way. This is where Skiva's Octofire Turbo Smart USB Charger comes in. This one of its kind USB charger has been designed for a typical American family with multiple Smartphones and tablets.

Octofire Turbo Smart USB Charger is the first ever USB charger that is equipped with 8 ports, to simultaneously charge, eight devices at optimum speed. It is capable of charging almost every USB powered device. Another unique feature of Octofire Turbo is its intelligent charging function that automatically detects device's power requirement and configures the port for that device.

### Features

- **Safety:** UL, CE, FCC and RoHS Certified with protection for overcharge, over-voltage, overheat & short circuit.
- **Ultra-Fast Charging:** Up to 8 USB devices at a time.
- **Smart Detection:** Optimal charging by intelligent device detection.
- **Device Compatibility:** Capable of charging Smartphones, tablets, GPS, Bluetooth headset or any other USB device.
- **International Compatibility:** With 100-240VAC 47-63Hz power input, Octofire Turbo can be used in any country.
