

Skiva Technologies Inc.

Skiva Technologies is a privately-held company dedicated to designing and manufacturing world class consumer electronics products. They have a rich tradition of creating Smartphone/tablet accessories and wireless home networking products that make life easier for users. Skiva is headquartered in Irving, Texas (USA), and the company's R&D center and sales office are located in India. Top of the line products from Skiva Technologies are available throughout the US and Canadian market through various sales channels.

The illustrious journey of Skiva Technologies started in 2011. Right from the very beginning, the company's vision has been to create best in class products that deliver the best value for its customers. Skiva is well known in the market for their innovative private cloud technology that is unique in the industry. Their private cloud Wi-Fi routers help small businesses and homes to setup their own cloud storage without subscription fees. Skiva has recently announced the industry's first ever smart USB charger (OctoFire Turbo) with eight ports.

Within their short tenure in the market, Skiva has experienced extraordinary success and their revenue has grown multifold. At present, the company has 16 highly talented and energetic employees. Skiva is a Consumer Electronics Association (CEA) member, a MHL Consortium member, and an Apple's MFI technology licensee.
