

AesthetiCare Cosmetic Surgery Institute Announces Limited Lifetime Warranty

AesthetiCare in Orange County, CA is the only cosmetic surgical center in California that offers a warranty on the result of a surgical procedure. The warranty covers the cost of anesthesia, operating room, replacement implants and follow-up visits.

NEWPORT BEACH, CA, January 3, 2014 – AesthetiCare Cosmetic Surgery Institute (www.aestheticare.com) today introduced the only [warranty program](#) that offers limited protection for a surgical procedure.

According to AesthetiCare, nearly 10 percent of all cosmetic surgery procedures nationwide require some revision or correction later in the patient's life. AesthetiCare is the first medical group to offer a warranty for revision of their patient's previous operations, including breast implant leakage.

The warranty usually covers 100 percent of the surgeon's fees. Anesthesia and operating room fees are at AesthetiCare's cost. There is no charge for replacement implants (for deflation or rupture) and follow-up office visits are also free. Charges are determined on case-by-case basis, depending on the medical situation. AesthetiCare notes that costs are often covered by the implant manufacturer's warranties and medical insurance.

"Our goal is to ensure the complete care and satisfaction of our patients," said Dr Ronald Moser, surgical director of AesthetiCare. "Surgery is not always an exact science and there can be some unforeseen complications. This warranty program removes the risk of leaving the patient with less than satisfying experience."

Dr. Moser added that in making an investment in their appearance, patients need reassurance that AesthetiCare is fully invested in the patient's safety and satisfaction. Any problems that patients may have because of their cosmetic surgery will be dealt with the most cost effective and efficient manner.

"The warranty adds that extra measure of confidence for the patient that any problems that they may experience for the rest of their life will be taken care of by their surgeons at AesthetiCare at little or no cost," he said. "Of course, patients are assured that their experience at AesthetiCare will be medically safe, but we also want our patients to be happy with the results."

AesthetiCare Cosmetic Surgery Institute is Orange County's leading cosmetic surgery and plastic surgery center with [offices](#) located in Orange County, San Diego and the Inland Empire. Cosmetic Surgeon [Ronald E. Moser, M.D.](#) and Plastic Surgeon [S. Allan Kane M.D.](#) have been in practice for more than 23 years. AesthetiCare surgeons have performed cosmetic surgery or plastic surgery on over 16,000 patients from all over Southern California and across the country.

Both Dr. Moser and Dr. Kane offer a wide range of advanced cosmetic procedures such as breast enlargement, lifts or reductions, liposuction, tummy tucks, eyelid surgery, nasal surgery and face lifts.

For those patients seeking long term confidence in their surgeon's abilities, AesthetiCare should be their first choice. No other cosmetic or plastic surgical group offers their patients such a comprehensive postoperative warranty program. Patients can be assured that they will have someone to turn to should post operative complications or problems arise at any time for the rest of their life.

AesthetiCare Cosmetic Surgery Institute's main offices are located at 30260 Rancho Viejo Road in San Juan Capistrano, CA. For more information, visit www.aestheticare.com or call (949) 661-1700.
